**DEPARTMENT OF THE INTERIOR****National Park Service****Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects from Idaho County, ID in Possession of the Cottonwood District Office, Bureau of Land Management, Cottonwood, ID**

**AGENCY:** National Park Service.

**ACTION:** Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects from Idaho County, ID that are in possession of the Cottonwood District Office, Bureau of Land Management (BLM), Cottonwood, ID.

A detailed assessment of the human remains and associated funerary objects from Idaho County, ID was made by the Bureau of Land Management professional staff in consultation with the Nez Perce Tribe of Idaho.

In 1963, human remains representing two individuals were recovered from site 10IH57, Idaho County, ID during legally authorized excavations by Idaho State University personnel prior to the construction of Idaho State Highway 95 through the site. No known individuals were identified. The minimum of 350 associated funerary objects includes beads, glass, mirrors, bracelets, cloth, wood, rings, nails, iron hooks, hoops, shells, and non-human bone.

Based on the associated funerary objects, these human remains have been determined to be Native American from the historic period. Continuities of material culture, ethnographic information, and historical documents indicate the Nez Perce Tribe of Idaho has occupied this area from precontact times into the historic period.

Based on the above-mentioned information, officials of the Bureau of Land Management have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of two individuals of Native American ancestry. Officials of the Bureau of Land Management have also determined that, pursuant to 43 CFR 10.2 (d)(2), the minimum of 350 objects listed above are reasonably believed to have been placed with or near the individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Bureau of Land Management have determined that, pursuant to 43 CFR
