SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. No. 93-275) and the Department of Energy Organization Act (Pub. L. No. 95-91), the Energy Information Administration (EIA) is obliged to carry out a central, comprehensive, and unified energy data and information program. As part of this program, EIA collects, evaluates,

assembles, analyzes, and disseminates data and information related to energy resource reserves, production, demand, and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

The EIA, as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13)), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps EIA to prepare data requests in the desired format, minimize reporting burden, develop clearly understandable reporting forms, and assess the impact of collection requirements on respondents. Also, EIA will later seek approval by the Office of Management and Budget (OMB) for the collections under Section 3507(h) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104-13, title 44, U.S.C. Chapter 35).

II. Current Actions

The EIA will request a three-year extension through August 31, 2001, to continue using Forms EIA-63A and EIA-63B. No substantive modifications to the currently approved forms will be proposed unless substantive suggestions are received and approved.

The forms currently are used to gather information on the supply and distribution of solar thermal collectors, photovoltaic cells, and photovoltaic modules. Specifically, the forms collect information on manufacturing, imports, exports, and shipments. The EIA has been collecting this information annually and proposes to continue the surveys. The data collected will be published in the Renewable Energy Annual and will also be available through EIA's Internet site at <http://www.eia.doe.gov/fuelrenewable.html>.

III. Request for Comments

Prospective respondents and other interested parties should comment on the actions discussed in item II. (If your comments apply to a specific form, please indicate one.) The following guidelines are provided to assist in the preparation of responses.

General Issues

A. Are the proposed collections of information necessary for the proper performance of the functions of the agency and does the information have

practical utility? Practical utility is defined as the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness, and the agency's ability to process the information it collects.

B. What enhancements can EIA make to the quality, utility, and clarity of the information to be collected?

As a Potential Respondent

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarification?

B. Can data be submitted by the due date?

C. Public reporting burden for each form is estimated to average approximately three hours.

Burden includes the total time, effort, or financial resources expended to generate, maintain, retain, or disclose or provide the information. Please comment on: (1) The accuracy of our estimate, and (2) how the agency could minimize the burden of the collection of information, including the use of information technology.

D. EIA estimates that respondents will incur no additional costs for reporting other than the hours required to complete the collection. The information requested is expected to be available in each respondent's business information system. What are the estimated: (1) Total dollar amount annualized for capital and start-up costs, and (2) recurring annual costs of operation and maintenance, and purchase of services associated with this data collection?

E. Do you know of any other Federal, State, or local agency that collects similar data? If you do, specify the agency, the data element(s), and the methods of collection.

As a Potential User

A. Can you use data at the levels of detail indicated on the form(s)?

B. For what purpose would you use the data? Be specific.

C. Are there alternate sources of data and do you use them? If so, what are their deficiencies and/or strengths?

D. For the most part, information is published by EIA in U.S. customary units, e.g., cubic feet of natural gas, short tons of coal, and barrels of oil. Would you prefer to see EIA publish more information in metric units, e.g., cubic meters, metric tons, and kilograms? If yes, please specify what information (e.g., coal production, natural gas consumption, and crude oil imports), the metric unit(s) of measurement preferred, and in which

EIA publication(s) you would like to see such information.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.

Statutory Authority: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104-13).

Issued in Washington, D.C., March 4, 1998.
