**The Proposal**

The FAA is considering an amendment to 14 CFR part 71 to establish Class E airspace at Martin, SD, to accommodate aircraft executing the proposed GPS Rwy 32 SIAP, at Martin Municipal Airport by creating controlled airspace for the airport. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing the approach. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**§ 71.1 [Amended]**

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

**Proposed Modification of Class E Airspace; Milwaukee, WI**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to modify Class E airspace at Milwaukee, WI. A VHF Omnidirectional Range (VOR) Standard Instrument Approach Procedure (SIAP) to Runway (Rwy) 32, has been developed for John H. Batten Field. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. In addition, a review of the Class E airspace at Milwaukee, WI, determined a modification was required to accommodate rising terrain for diverse departures at General Mitchell International Airport, Waukesha County

Airport, and Lawrence J. Timmerman Airport. This action proposes to increase the radii of the existing controlled airspace for these airports.

**DATES:** Comments must be received on or before April 24, 1998.

**ADDRESSES:** Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, AGL-7, Rules Docket No. 98-AGL-5, 2300 East Devon Avenue, Des Plaines, Illinois 60018.
