**SUPPLEMENTARY INFORMATION:** Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. § 824a(e)).

On February 9, 1996, in Order EA-100-A, the Office of Fossil Energy (FE) of the Department of Energy (DOE) authorized San Diego Gas & Electric Company (SDG&E) to transmit electric energy from the United States to British Columbia Hydro and Power Authority (BC Hydro) on a non-firm basis at a maximum rate of transmission of 400 megawatts (MW). That order expires on April 19, 1998. On March 3, 1998, SDG&E filed an application for renewal of this export authority. The electric energy SDG&E proposes to export would be delivered to Canada over the international transmission facilities owned by the Bonneville Power Administration.

On May 30, 1996, in FE Order No. EA-105-MX, FE authorized NorAm to export electric energy to Mexico, as a power marketer, using the facilities of SDG&E, El Paso Electric Company, Central Power and Light Company, and Comission Federal de Electricidad, the national electric utility of Mexico. On March 6, 1998, NorAm submitted an application to FE to renew that authorization which will expire on May 30, 1998. In seeking renewal of its export authority, NorAm requested that the list of authorized border crossings be amended to include the following international transmission facilities owned by Arizona Public Service Company:
