ADDRESSES: Submit written comments on the collection of information to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., 725 17th St. NW., rm. 10235, Washington, DC 20503, Attn: Desk Officer for FDA.

FOR FURTHER INFORMATION CONTACT: Karen L. Nelson, Office of Information Resources Management (HFA-250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-1482.

SUPPLEMENTARY INFORMATION: In compliance with section 3507 of the PRA (44 U.S.C. 3507), FDA has submitted the following proposed collection of information to OMB for review and clearance.

National Tobacco Retailer Tracking Survey

On February 28, 1997, new Federal regulations in 21 CFR part 897 went into effect that prohibit retailers from selling cigarettes and smokeless tobacco to persons younger than 18 years of age, and require retailers to verify, by means of photographic identification, the age of purchaser younger than 27 years old. To enforce these requirements, FDA is commissioning State officials to conduct compliance checks during which an adolescent, accompanied by a commissioned official, will attempt to

purchase cigarettes and smokeless tobacco at retail establishments.

FDA is planning to conduct a national advertising campaign aimed at raising retailers' awareness of the new regulations and motivating retailers to comply. The campaign will target persons who sell cigarettes or smokeless tobacco to consumers for their personal use, including clerks and cashiers in grocery and convenience stores, pharmacies and drug stores, gas stations, liquor stores, taverns and bars, and tobacco stores. As a part of the campaign, FDA is proposing to conduct a three-part telephone survey of tobacco retailers to measure their awareness of, and compliance with, the new regulations before and after exposure to the advertising campaign.

The initial overall media campaign would focus on the 10 States with which FDA has already contracted to conduct compliance checks, and would be expanded as additional States contract with FDA. The media campaign would be conducted over a 12-month period in each State that receives it. States that have contracted with FDA and are exposed to the media campaign (test States) will be compared with States that have not contracted with FDA (control States). Although some of the control States may contract with FDA during the course of the data collection, at the start of the data collection there would be 10 test States and 10 control States.

A total of 6,000 tobacco retailers would be randomly selected to participate in a telephone interview over three phases of data collection. Data would be collected in three phases over a 12-month period. The first phase would occur immediately before the 10

test States that have contracted with FDA are exposed to the media campaign. The second phase would occur approximately 6 months later and would allow for an assessment of retailer awareness of and compliance with the new regulations after recent exposure to the advertising campaign in the original 10 test States. A third phase of data collection would be conducted approximately 6 months after the second phase. This phase would address retailer awareness of and compliance with the new regulations after extended exposure to the media campaign in the original 10 test States, and would address retailer awareness of and compliance with the new regulations after recent exposure to the advertising campaign in those former control States that contracted with FDA after the first phase of data collection. All interviewing would be conducted by a single-market research firm that would employ computer-aided telephone interviewing technology to expedite the fieldwork and improve accuracy. FDA plans to use the results of the survey to assess the effectiveness of the advertising campaign. Under section 903(b)(2)(C) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 393 (b)(2)(C)), FDA is authorized to conduct surveys and other research relating to its responsibilities.

In the **Federal Register** of December 30, 1997 (62 FR 67876), the agency requested comments on the proposed collection of information. No comments were received.

Respondents to this collection of information would be tobacco retailers and salesclerks.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN¹

No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
6,000	1	6,000	0.2	1,200

¹There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: March 20, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.
