

Virginia. The telephone number is (703) 548-6300.

Both days, April 14 and 15, will be devoted partly to breakout sessions for the three subcommittee workgroups (Reporting and Information Access; Overcoming Barriers to Pollution Prevention, Product Stewardship, and Recycling; and Integrated and Sustainable Alternative Strategies for Electronics) and partly to plenary sessions. Over the course of the two days, the Subcommittee will be discussing progress on a number of projects for environmental protection in the computers and electronics industry.

Projects that will be discussed include: BOLDER (Basic On-Line Disaster and Emergency Response), a project to integrate the BOLDER emergency response electronic reporting and information access system with the EPA "One Plan," and to implement a full-scale test of the system in Phoenix, AZ.; Beta-BOLDER, a project to test the transferability of the BOLDER system to less technologically advanced communities by pilot testing the system in at least one small city; Better BOLDER, a project to make the BOLDER facility emergency response plan information accessible to the public in a useful context, using both the Internet and other means; CURE (Consolidated Uniform Report for the Environment), a project to develop and test in Texas a system for submitting environmental information required by multiple statutes on a single form, and to make that form electronic; Voluntary Program for Life Cycle Management of Electronic Products/State Multi-Stakeholder Dialogue, a project to develop a challenge program with incentives to marshal industry's interest and capacity to preserve resources and promote recycling, building on current state programs; SPECIE (Superior Performance for the Environment through Community Involvement and Engagement), a project to develop a printed resource guide to strengthen community collaboration in projects requiring input from multiple stakeholders by providing tools to assist stakeholders to develop cooperative and constructive approaches to addressing environmental issues in their communities; Evaluation of Models and Development of Best Practices for Electronic Equipment Recovery/San Francisco Recycling Pilot, a project to compile and examine data from pilot collection projects, including one in San Francisco, identify data gaps, and

provide an umbrella report to communities and the recycling industry; Green Track, a project to develop a program that offers regulatory flexibility or other incentives to encourage facilities to improve environmental performance beyond current regulatory requirements; Definition of "Legitimate Recycling," a project to seek consensus-based decisions on the recycling of computer parts, and define certain electronics-related activities that the sector would recommend EPA exempt from existing solid waste regulation.

Opportunity for public comment on major issues under discussion will be provided at intervals throughout the meeting.

The EGTF is a committee of the National Advisory Council for Environmental Policy and Technology (NACERT), the external policy advisory board to the Administrator of EPA.

The EGTF was established in July of 1992 to advise EPA on the Effluent Guidelines Program, which develops regulations for dischargers of industrial wastewater pursuant to Title III of the Clean Water Act (33 U.S.C. 1251 *et seq.*). The Task Force consists of members appointed by EPA from industry, citizen groups, state and local government, the academic and scientific communities, and EPA regional offices. The Task Force was created to offer advice to the Administrator on the long-term strategy for the effluent guidelines program, and particularly to provide recommendations on a process for expediting the promulgation of effluent guidelines.
