

credit, and reference price apply to qualified fuels sold during calendar year 1997.

INFLATION FACTOR: The inflation adjustment factor for calendar year 1997 is 2.0331.

CREDIT: The nonconventional source fuel credit for calendar year 1997 is \$6.10 per barrel-of-oil equivalent of qualified fuels.

PRICE: The reference price for calendar year 1997 is \$17.24. Because this reference price does not exceed \$23.50 multiplied by the inflation adjustment factor, the phaseout of credit provided for in section 29(b)(1) does not occur for any qualified fuel sold in calendar year 1997.

Renewable Electricity Production Credit, Publication of Inflation Adjustment Factor and Reference Prices for Calendar Year 1998

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Publication of inflation adjustment factor and reference prices for calendar year 1998 as required by section 45(d)(2)(A) (26 U.S.C. 45(d)(2)(A)).

SUMMARY: The 1998 inflation adjustment factor and reference prices are used in determining the availability of the renewable electricity production credit under section 45(a).

DATES: The 1998 inflation adjustment factor and reference prices apply to calendar year 1998 sales of kilowatt hours of electricity produced in the United States or a possession thereof from qualified energy resources.

INFLATION ADJUSTMENT FACTOR: The inflation adjustment factor for calendar year 1998 is 1.1240.

REFERENCE PRICES: The reference prices for calendar year 1998 are 4.95¢ per kilowatt hour for facilities producing electricity from wind and 0¢ per kilowatt hour for facilities producing electricity from closed-loop biomass. The reference price for electricity produced from closed-loop biomass, as defined in section 45(c)(2), is based on a determination under section 45(d)(2)(C) that in calendar year 1997 there were no sales of electricity generated from closed-loop biomass energy resources under contracts entered into after December 31, 1989.

Because the 1998 reference prices for electricity produced from wind and closed-loop biomass energy resources do not exceed 8¢ multiplied by the inflation adjustment factor, the phaseout of the credit provided in section 45(b)(1) does not apply to electricity sold during calendar year 1998.

CREDIT AMOUNT: As required by section 45(b)(2), the 1.5¢ amount in section 45(a)(1) is adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale occurs. If any amount as increased under the preceding sentence is not a multiple of 0.1¢, such amount is rounded to the nearest multiple of 0.1¢. Under the calculation required by section 45(b)(2), the renewable electricity production credit for calendar year 1998 under section 45(a) is 1.7¢ per kilowatt hour on the sale of electricity produced from closed-loop biomass and wind energy resources.
