SUPPLEMENTARY INFORMATION:

Background

The final rule that is the subject of these corrections affects the internal management of the RUS telecommunications program. This rule reflected the recently approved reorganization of the RUS telecommunications program. The intended effect of this action was to provide efficient utilization of program personnel resources. The new organizational structure will be put into place in the near future. To better guide and assist the public, RUS is amending the rule to reflect the current rather than the newly approved organizational structure. Following the establishment of the new telecommunications program

organizational units, the public will be advised accordingly.

Need for Correction

As published, the final rule contains information that may be misleading and is in need of modification.

Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped With Pratt & Whitney JT9D-3 and -7 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects erroneous references that appeared in airworthiness directive (AD) 98-02-02 that was published in the **Federal Register** on January 16, 1998 (63 FR 2593). The erroneous references resulted in incorrect citations of AD numbers. That AD is applicable to certain Boeing Model 747 series airplanes. It supersedes an existing AD to continue to require repetitive inspections for discrepancies of the forward engine mount bulkhead of the nacelle strut, and corrective actions, if necessary. That AD also continues to provide for an optional terminating action for the repetitive inspections. For certain airplanes, the AD adds various inspections to detect discrepancies in the forward engine mount bulkhead and chord, and in the forward lower spar web, and corrective actions, if necessary. The AD also adds an additional optional terminating action for the repetitive inspections.

DATES: Effective February 2, 1998.

The incorporation by reference of certain publications listed in the regulations was previously approved by the Director of the Federal Register as of February 2, 1998 (63 FR 2593, January 16, 1998).
