

SUPPLEMENTARY INFORMATION: The Draft PA/EA analyzed two alternatives: (1) No action/no lease; and (2) lease under a no surface occupancy stipulation. Analysis focused on addressing several issues, including impacts to water quality (municipal and private drinking water supplies and fishing opportunities), aesthetics, wetlands, threatened and endangered species, recreation, cultural/historic/Native American resources, public health and safety, and liability. Comments on the Draft PA/EA will be used to formulate the proposed PA/EA. After the release of the proposed plan, any person who participated in the planning process and has an interest which is or may be adversely affected by the approval of the plan may file a protest with the Director of the BLM. After resolution of any protests, BLM will release a Final PA/EA, which will be the basis of BLM/COE decisions for the management of Federal mineral resources in the planning area.

Title: Survey—Testing and Calibrating the Measurement of Nonmarket Values for Natural Resources via the Contingent Valuation Methods.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended, directs the Secretary of the Interior to prepare a "5-Year Program" that specifies the schedule of offshore natural gas and oil lease sales for the 5-year period covered by the document.
