Bureau of Reclamation

Tucson Aqueduct System Reliability Investigation, Central Arizona Project, INT-FES 98-12

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability on the final environmental impact statement.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969 (as amended) (NEPA), the Bureau of Reclamation (Reclamation) has prepared a final environmental impact statement (FEIS) for the Tucson Aqueduct System Reliability Investigation (TASRI) project, Tucson Division, Central Arizona Project (CAP). The FEIS addresses alternatives that have been studied to incorporate short-term delivery reliability into the CAP system for the Tucson area. This short-term reliability would ensure the delivery of CAP water to Tucson area users during periods of planned maintenance outages of the CAP. Reclamation proposes the construction of a 15,000 acre-foot surface storage reservoir, located southwest of the Tucson metropolitan area, to provide reliability to Tucson area CAP water users.

ADDRESSES: Copies of the FEIS are available for public inspection and review at the following locations:

- Bureau of Reclamation, Regional Liaison Office, Room 7624, 1849 C Street NW, Washington, D.C. 20240; telephone (202) 208-6269
