

rendered sterile. The document also identifies CGMP's for the manufacture of API's used in the production of drug products for clinical trials.

The draft guidance incorporates the following two fundamental concepts in API production: (1) Application of CGMP controls to all steps in the manufacturing process, beginning with the use of starting materials; and (2) validation of those steps determined to be critical to the quality and purity of the final API. The guidance clarifies the agency's expectations regarding application of CGMP's (i.e., extent of written instructions, in-process controls, sampling, testing, monitoring, and documentation) to different steps of an API process.

This draft guidance represents the agency's current thinking on the manufacture and control of API's. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirement of the applicable statute, regulations, or both.

Written requests for single copies of the guidance "Manufacturing, Processing, or Holding Active Pharmaceutical Ingredients" should be submitted to the Drug Information Branch (HFD-210), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send one self-addressed adhesive label to assist that office in processing your requests. Requests should be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.
