The issue to be considered is whether the Superseding Order should be sustained—in particular, whether the NRC Staff's currently effective suspension of Dr. Ben-Haim from serving as a consultant or otherwise being involved with respect to NRC-licensed activities should be continued for a period of five years from July 31, 1997, as a result of alleged deliberate violations of NRC requirements.

The number of persons making oral statements and the time allotted for each statement may be limited depending on the number of persons present at the designated time. (Normally, each oral statement may extend for up to five (5) minutes.) These statements do not constitute testimony or evidence but may assist the Licensing Board and parties in defining the scope of the issues in the proceeding.

**NUCLEAR REGULATORY COMMISSION**

[Docket No. 50-423]

**Central Maine Power Company; Millstone Nuclear Power Station, Unit 3, Notice of Consideration of Issuance of an Order Regarding Restructuring of Central Maine Power Company**

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an Order approving, under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.80, an application regarding the proposed corporate restructuring of Central Maine Power Company (CMP), which holds a partial ownership interest in Millstone Nuclear Power Station, Unit 3. By application dated March 4, 1998, CMP, by and through its counsel, Morgan, Lewis, and Bockius, informed the Commission that it is proposing to become a wholly owned subsidiary of a newly created holding company, HoldCo, which will be renamed later. Northeast Nuclear Energy Company will remain the licensed operator of Millstone Unit 3 and is not involved in the transaction. No direct transfer of the license or any interest therein will occur. Under the restructuring, the holders of CMP common stock will become the holders of the common stock of the holding company. After the restructuring, CMP will continue to be a public utility providing the same utility services as it did immediately prior to the restructuring, and will continue to be an "electric utility" under Commission regulations. According to the application, there will be no effect on the management, or sources of funds for operation, maintenance, or decommissioning, of
