

Public Participation

The DACOIM meeting is open to the public, but advance notice of attendance is requested to ensure adequate seating. Persons planning to attend should notify the contact person at least two (2) days prior to the meeting. Members of the public may submit written statements at any time before or after the meeting for consideration by the DACOIM. Written statements should be sent to Susan Young, Designated Federal Officer, Immigration and Naturalization Service, 26 Federal Plaza, Room 14-100, New York, New York 10278, telephone: (212) 264-0736. Only written statements received by 5:00 p.m. on May 22, 1998 will be considered for presentation at the meeting. Minutes of the meeting will be available upon request.

Dated: April 27, 1998.

Doris Meissner,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF LABOR**Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting Notice**

Pursuant to the provisions of the Federal Advisory Committee Act (P.L. 92-463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time, and place: May 13, 1998, 10:00 am, U.S. Department of Labor, Rm. S-5215 A/B, 200 Constitution Ave., NW, Washington, D.C. 20210.

Purpose: The meeting will include a review and discussion of current issues which influence U.S. trade policy. Potential U.S. negotiating objectives and bargaining positions in current and anticipated trade negotiations will be discussed. Pursuant to 19 U.S.C. 2155(f) it has been determined that the meeting will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions. Accordingly, the meeting will be closed to the public.

For further information contact: Jorge Perez-Lopez, Director, Office of International Economic Affairs, *Phone:* (202) 219-7597.

Signed at Washington, DC, this 25th day of April 1998.

Andrew James Samet,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510-28-M

DEPARTMENT OF LABOR**Employment Standards Administration****Wage and Hour Division****Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions**

General Wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29

CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S-3014, Washington, D.C. 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office

(GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts." This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487-4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 23rd day of April 1998.

Carl J. Poleskey,

Chief, Branch of Construction Wage Determinations.

BILLING CODE 4510-27-M

NUCLEAR REGULATORY COMMISSION

[DOCKET NO. 50-341]

Detroit Edison Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-43 issued to the Detroit Edison Company (the licensee) for operation of the Fermi 2 plant located in Monroe County, Michigan.

The proposed amendment would revise Technical Specification (TS) 3.8.1.1 to change the emergency diesel generator (EDG) allowed outage time (AOT) from 3 to 7 days. In order to use the extended AOT, the revised TS will require the licensee to ensure the

alternate AC power source (combustion turbine-generator 11-1) is operable and to verify the planned activity is not potentially risk significant in accordance with use of the licensee's configuration risk management program as described in a new paragraph in the Administrative Controls section of the TS.

The amendment was requested in a submittal dated November 22, 1995, as supplemented February 19, April 19, May 3, June 12, and December 4, 1996, January 30 and August 7, 1997, and April 27, 1998. The staff issued a **Federal Register** notice on February 28, 1996 (61 FR 7550), providing the notice of consideration of issuance of the amendment, proposed no significant hazards consideration (NSHC), and opportunity for a hearing. The portions of the November 22, 1995, submittal related to changes in EDG surveillance testing and reporting requirements (also discussed in the NSHC) were addressed in amendment no. 107 issued on June 20, 1996. The February 19, April 19, May 3, June 12, and December 4, 1996, and August 7, 1997, submittals provided additional information but did not change the proposed TS or the staff's initial proposed determination of NSHC. The January 30, 1997, submittal added a verification that the alternate AC source is available prior to entering the 7-day AOT. This submittal also did not change the staff's initial proposed determination of NSHC. The April 27, 1998, submittal added a description of the Fermi 2 configuration risk management program (CRMP) to the Administrative Controls section of the TS. This submittal included a determination of NSHC for the change, as discussed below. The current notice encompasses the changes described in the January 30, 1997, and April 27, 1998, submittals.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the April 27, 1998, supplemental amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a

margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The Configuration Risk Management Program (CRMP) is an Administrative Program that assesses risk based on plant status. This proposed change does not change the design, configuration, or method of plant operation. Adding the requirement to implement this program for Technical Specification (TS) 3.8.1.1 does not affect the probability or the consequences of an accident.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

This proposed change does not change the design, configuration, or method of plant operation. Therefore, this change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed change does not involve a physical modification to the plant, a new mode of operation or a change to the UFSAR [updated final safety analysis report] transient analyses. The proposed change adds additional requirements to the evaluation of equipment outages. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received by the close of business within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should
