Chemical: Isocyanic acid, polymethylenepolyphenylene ester, polymer with 2,2-dimethyl-1,3-propanediol, .alpha.-hydro-.omega.-hydroxypoly[oxy(methyl-1,2-ethanediyl)], 1,3-isobenzofurandione and 1,1'-methylenebis[4-isocyanatobenzene].

Use: Adhesive for concrete to metal assembly.

Production Volume: 108,000 kg.

Number of Customers: One.

Test Marketing Period: 12 months.

Risk Assessment: EPA identified concerns for lung toxicity and respiratory sensitization based on data on analogous chemical substances. However, the health concerns were mitigated by requiring workers potentially exposed to the TME substance via inhalation to wear a NIOSH-approved air-supplied respirator with an Assigned Protection Factor (APF) of 2,000 for those operations when the substance is handled as a liquid under heated conditions (70°C or greater). Therefore, the Agency has determined that the test market activities will not present an unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information

come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.
