

III. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before November 2, 1998. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

IV. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** (56 FR 29362) June 26, 1991; [FRL 3846-4]. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

Carbofuran; Receipt of Application for Emergency Exemption, Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Arkansas State Plant Board hereafter referred to as the "Applicant" to use the pesticide flowable Carbofuran (Furadan 4F Insecticide/Nematicide) (EPA Reg. No. 279-2876) to treat up to 1 million acres of cotton, to control cotton aphids. The Applicant proposes the use of a chemical which has been the subject of a Special Review within EPA's Office of Pesticide Programs. The granular formulation of carbofuran was the subject of a Special Review between the years of 1986-1991, which resulted in a negotiated settlement whereby most of the registered uses of granular carbofuran were phased out. While the flowable formulation of carbofuran is not the subject of a Special Review, EPA believes that the proposed use of flowable carbofuran on cotton could pose a risk similar to the risk assessed by EPA under the Special Review of granular carbofuran. Additionally, in 1997 EPA denied requests made under provisions of section 18 for this use of flowable carbofuran. Therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before May 21, 1998.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP-181061," should be submitted by mail to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Follow the instruction under "SUPPLEMENTARY INFORMATION." No Confidential Business Information (CBI) should be submitted through e-mail.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be included in the public record by EPA without prior notice.

The public docket is available for public inspection in Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: David Deegan, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number and e-mail: CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-308-9358); e-mail: deegan.dave@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of carbofuran on cotton to control aphids. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that the state of Arkansas is likely to experience non-routine infestations of aphids during the 1998 cotton growing season. The applicant further claims that, without a specific exemption of FIFRA for the use of flowable carbofuran on cotton to control cotton aphids, cotton growers in the state will suffer significant economic losses. The applicant also details a use program designed to minimize risks to pesticide handlers and applicators, non-target organisms (both Federally-listed endangered species, and non-listed species), and to reduce the possibility of drift and runoff.

The Applicant proposes to make no more than two applications of flowable carbofuran on cotton at the rate of 0.25 lb. active ingredient (a.i.) [(8 fluid oz.)] in a minimum of 2 gallons of finished spray per acre by air, or 10 gallons of finished spray per acre by ground application. The total maximum proposed use during the 1998 growing season June 1, 1998 until September 30, 1998 would be 0.5 lb. a.i. (16 fluid oz.) per acre. The applicant proposes that the maximum acreage which could be treated under the requested exemption would be 1 million acres, with approximately half of that acreage requiring a second application. If all the proposed acres were treated at the maximum proposed rate, then 375,000 lbs. a.i. would be used in Arkansas.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a chemical (i.e., an active ingredient) which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and the proposed use could pose a risk similar to the risk assessed by EPA under the previous Special Review. Such notice provides for opportunity for public comment on the application.

The official record for this notice, as well as the public version, has been established for this notice under docket number [OPP-181061] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at: opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1/6.1 or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP-181061]. Electronic comments on this notice may be filed online at many Federal Depository Libraries.

The Agency, accordingly, will review and consider all comments received

during the comment period in determining whether to issue the emergency exemption requested by the Arkansas State Plant Board.

ENVIRONMENTAL PROTECTION AGENCY

[OW-FRL-6010-4]

Contaminated Sediment Management Strategy

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability.

SUMMARY: The Environmental Protection Agency (EPA) announces the availability of EPA's Contaminated Sediment Management Strategy, an Agency workplan issued in support of EPA's regulatory and policy initiatives. The Strategy does not propose new regulation and is Agency guidance only. Also available for review is the Comment and Response Document.

EPA's Contaminated Sediment Management Strategy describes the cross-program policy framework in which EPA intends to promote consideration and reduction of ecological and human health risks posed by sediment contamination. The Strategy establishes four goals to manage the problem of contaminated sediment, and describes actions the Agency intends to take to accomplish those goals. The four goals are: (1) Prevent the volume of contaminated sediment from increasing; (2) reduce the volume of existing contaminated sediment; (3) ensure that sediment dredging and dredged material disposal are managed in an environmentally sound manner; and (4) develop scientifically sound sediment management tools for use in pollution prevention, source control, remediation, and dredged material management.

ADDRESSES: Requests for copies of EPA's Contaminated Sediment Management Strategy (EPA document number EPA 823-R-98-001) should be sent to: U.S. Environmental Protection Agency, National Center for Environmental Publications and Information, P.O. Box

42419, Cincinnati, Ohio 45242; telephone: 1-800-490-9198, fax: 513-489-8695. EPA's Contaminated Sediment Management Strategy may be viewed or downloaded from the Office of Science and Technology's homepage on the Internet at <http://www.epa.gov/OST/>. The Contaminated Sediment Management Strategy and Comment and Response Document are available for public inspection and copying from 9:00 am to 4:00 pm at the Water Docket, East Tower Basement, Environmental Protection Agency, Mail Code 4101, 401 M Street, S.W., Washington, D.C. 20460. Also available are related docket materials which include: the proposed Strategy, all public comments received on the Strategy as well as those received on an earlier proposal for discussion, and the proceedings of three national public forums held to discuss development of the Strategy. For an appointment to review Docket materials, call the Water Docket Clerk at 202-260-3027 between 9 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Jane M. Farris, Risk Assessment and Management Branch, Office of Science and Technology, Mail Code 4305, 401 M Street, S.W., Washington, D.C. 20460, Telephone: 202-260-8897.

SUPPLEMENTARY INFORMATION: EPA accepted written comments on the proposed Contaminated Sediment Management Strategy for 90 days after publication of the notice of availability in the **Federal Register** on August 30, 1994, and publication of a notice of extension of comment period in the **Federal Register** on October 28, 1994. At the close of the comment period on November 30, 1994 through 1997, EPA's Office of Science and Technology within the Office of Water developed responses to comments received from 126 organizations. The Strategy and comment/response document have been reviewed and revised by four staff workgroups of the EPA Sediment Steering Committee who also drafted the proposed Strategy.

Executive Summary—EPA's Contaminated Sediment Management Strategy

Reinventing Government to Streamline Decision-making

Contaminated sediment poses ecological and human health risks in many watersheds throughout the United States. In these watersheds, sediment serves as a contaminant reservoir from which fish and bottom dwelling organisms can accumulate toxic compounds and pass them up the food
