#### Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Recycled Used Oil Management Standards

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** Today's proposal would eliminate errors and clarify ambiguities in the used oil management standards. Today's proposal, if promulgated, would make clear when used oil contaminated with polychlorinated biphenyls (PCBs) is regulated under the used oil management standards and when it is not, that the requirements applicable to releases of used oil apply in States that are not authorized for the RCRA base program, that mixtures of

conditionally exempt small quantity generator (CESQG) wastes and used oil are subject to the used oil management standards irrespective of how that mixture is to be recycled, and that the initial marketer of used oil that meets the used oil fuel specification need only keep a record of a shipment of used oil to the facility to which the initial marketer delivers the used oil. Today's proposal would also amend three incorrect references to the pre-1992 used oil specifications in the provisions which address hazardous waste fuel produced from, or oil reclaimed from, oil bearing hazardous wastes from petroleum refining operations.

In the Final Rules section of today's **Federal Register**, the U.S. Environmental Protection Agency (EPA) is also publishing a parallel direct final rule containing identical amendments which will become effective unless relevant adverse comments are received in response to this rulemaking. For more information on the direct final rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

**DATES:** Comments on this proposed rule must be received on or before June 5, 1998 and notice of intent to file adverse comments must be received on or before May 20, 1998.
