SUPPLEMENTARY INFORMATION:

I. Background

The Federal Mine Safety and Health Act of 1977, 30 U.S.C. 801, *et seq.* (Mine Act), recognizes that the role of education and training in the improvement of miner health and safety is an important element of federal efforts to make the nation's mines safer places in which to work. Section 115(a) of the Mine Act states that "each operator of a coal or other mine shall have a health and safety program which shall be approved by the Secretary." Title 30, C.F.R. §§ 48.3 and 48.23 specifically address the requirements for training plans. The standards are intended to ensure that miners will be effectively trained in matters affecting their health and safety, with the ultimate goal being the reduction of frequency and severity of the injuries in the nation's mines.

II. Current Actions

Approved training plans are used to implement training programs for training new miners, training newly employed experienced miners, training miners for new tasks, annual refresher training, and hazard training. The plans are also used by MSHA to ensure that all miners are receiving the training necessary to perform their jobs in the safest manner possible.
