SUPPLEMENTARY INFORMATION:

I. Background

The Cadmium standard and its information collection requirements provide protection for employees from the adverse health effects associated with occupational exposure to cadmium. The standard requires that employers establish a compliance program, including exposure monitoring and medical records. These records are used by employees, physicians, employers and OSHA to determine the effectiveness of the employers' compliance efforts. Also the standard requires that OSHA have access to various records to ensure that employers are complying with the disclosure provisions.

Type of Review: Extension.

Agency: Occupational Safety and Health Administration.

Title: Cadmium in General Industry (29 CFR 1910.1027), Cadmium in the Maritime Industry (1915.1027), and Cadmium in the Agriculture Industry (1928.1027).

OMB Control Number: 1218-0185.

Affected Public: Business or other for-profits, Federal government, State and Local governments.

Total Respondents: 54,544.

Frequency: On occasion.

Total Responses: 359,968.

Average Time per Response: Ranges from 5 minutes to maintain records to 1.5 hours for an employee to have a medical exam.

Estimated Total Burden Hours: 129,894.

Total Annualized capital/startup costs: -0-.

Total initial annual costs (operating/maintaining systems or purchasing services): \$19,068,500.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection. The comments will become a matter of public record.

Signed at Washington, DC, this 30th day of April, 1998.

Charles N. Jeffress,

Assistant Secretary of Labor.

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC)

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR Part 19, "Notices, Instructions, and Reports to Workers: Inspection and Investigations".

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* As necessary in order that adequate and timely reports of radiation exposure be made to individuals involved in NRC-licensed activities.

5. *Who will be required or asked to report:* Licensees authorized to receive, possess, use, or transfer material licensed by the NRC.

6. *An estimate of the number of responses:* 414,800.

7. *The estimated number of annual respondents:* 280.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 46,018 (approximately 34,566 reporting hours— an average of 5 minutes per response, and 11,452 recordkeeping hours— an average of 1.78 hours per recordkeeper).

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* Not applicable.

10. *Abstract:* Title 10 of the Code of Federal Regulations, Part 19, requires licensees to advise workers on an annual basis of any radiation exposure they may have received as a result of NRC-licensed activities or when certain conditions are met. These conditions apply during termination of the worker's employment, at the request of a worker, former worker, or when the worker's employer (the NRC licensee) must report radiation exposure information on the worker to the NRC. Part 19 also establishes requirements for instructions by licensees to individuals participating in licensed activities and options available to these individuals in connection with Commission inspections of licensees to ascertain compliance with the provisions of the Atomic Energy Act of 1954, as amended, Title II of the Energy Reorganization Act of 1974, and regulations, orders and licenses thereunder regarding radiological working conditions.

The worker should be informed of the radiation dose he or she receives because: (a) that information is needed by both a new employer and the individual when the employee changes jobs in the nuclear industry; (b) the individual needs to know the radiation dose received as a result of an accident or incident (if this dose is in excess of the 10 CFR Part 20 limits) so that he or she can seek counseling about future work involving radiation, medical attention, or both, as desired; and (c) since long-term exposure to radiation may be an adverse health factor, the individual needs to know whether the accumulated dose is being controlled within NRC limits. The worker also needs to know about health risks from occupational exposure to radioactive materials or radiation, precautions or procedures to minimize exposure, worker responsibilities and options to report any licensee conditions which may lead to or cause a violation of
