FEDERAL COMMUNICATIONS COMMISSION

[DA 98-808]

Waiver of Business and Industrial/Land Transportation Channel Construction Requirements

1. On February 20, 1998, Southern Company (Southern) filed a Request for Waiver of Section 90.629 of the Commission's Rules to further extend the extended implementation period for its Business and Industrial Land Transportation (I/LT) Category channels that Southern has converted to commercial use. Southern, an electric utility holding company, operates an 800 MHz Specialized Mobile Radio

(SMR) system on Business and I/LT channels, and on a small number of SMR and General Category channels.¹ The channels were licensed between 1992 and 1994, and Southern received a five-year extended implementation period. In 1995, Southern, apparently by means of intercategory sharing, converted the Business and I/LT channels to commercial use. It has constructed and placed in operation all of the base stations, and sixty-five percent of the channels, for which it is licensed. Southern seeks to extend the implementation period for its Business and I/LT channels, which expires on May 20, 1999, for an additional five years or until the Commission auctions those channels, whichever is sooner.

2. In its Request for Waiver, Southern asserts that a further extension of the implementation period is necessary because the current implementation period is unduly burdensome, frustrates the purpose of our rules, and is contrary

¹ Pursuant to the recently completed auction of licenses for the upper 200 channels of the SMR Service in the 800 MHz band, on March 9, 1998, Southern was conditionally granted licenses for frequency block A in BEAs 74, 75, and 78-82. See FCC Announces the Corrected Conditional Grant of 800 MHz SMR Licenses, Public Notice No. DA 98-482 (released March 10, 1998).
