Eligibility Assurance Form

All applicants MUST complete this check-list and attach appropriate documentation supporting eligibility (the state/tribe/territory wide comprehensive cancer control plan). The plan must be attached to this check-list, should not be incorporated into the body of the application or the appendices, and therefore does not affect the page limit for the application (30 pages) or appendices (20 pages). A copy of this form, with an attached reproducible plan, should be included with each copy of the application as a separate tabbed section.

___ A state/tribe/territory wide comprehensive cancer control plan has been developed. Plan is either:
 ___ an existing up-to-date plan ready for implementation, or
 ___ an up-to-date detailed final draft ready for implementation by September 30, 1998.

At a minimum,

- ___ Plan documents an integrated and coordinated state/tribe/territory wide approach to prevention, early detection, treatment, rehabilitation, and palliation of cancer (i.e., not a summation or compilation of categorical risk factor/specific cancer programs).
- ___ Plan identifies priorities to be addressed based on needs identified through assessment of the burden of the major detectable/preventable cancers in the State/Tribes/Territory.
- ___ Copy of the State/Tribes/Territory wide comprehensive cancer control

plan document is attached. (A reproducible, unbound, one-sided, 8½ x 11" copy of the plan should be attached to this form.)

Glossary

Terms are defined by DCPC in this Glossary to clarify issues for applicants under this RFA only. They are not meant to apply to all DCPC or CDC programs, activities, or RFAs.

Comprehensive Cancer Control: An integrated and coordinated approach to reduce the incidence, morbidity, and mortality [of cancer] through prevention, early detection, treatment, rehabilitation, and palliation.

Comprehensive Cancer Control Plan: Document that is developed as an optimal blueprint for achieving comprehensive cancer control in that State/Tribes/Territory. It should address information on cancer burden; short- and long-term goals and objectives; proposed strategies to meet objectives; assessment of existing and needed resources; and a plan for promoting access to full range of cancer control services.

At a minimum, a Comprehensive Cancer Control Plan: (1) documents an integrated and coordinated state/tribe/territory wide approach to prevention, early detection, treatment, rehabilitation, and palliation of cancer (i.e., not a summation or compilation of categorical risk factor/specific cancer programs); and (2) identifies the priorities to be addressed based on an assessment of the burden of the major detectable/preventable cancers in the State/Tribes/Territory.

Comprehensive Cancer Control Program: Based on goals and objectives established in the comprehensive cancer control plan, the overall set of actions that are conducted with available resources to translate the optimal plan into feasible reality.

Implementation: Conducting activities that are designed to achieve goals and objectives outlined in the Comprehensive Cancer Control Plan. Implementing the Plan is the same thing as conducting comprehensive cancer control activities or programs. For the purposes of programs funded under this RFA, implementation of the plan does not require that all goals and objectives in the State/Tribes/Territory wide comprehensive cancer control plan be implemented; implementation will be guided by the goals and objectives in the implementation plan developed for this RFA.

Indicator: A performance measure used to track critical processes over time to signify progress toward a particular desired outcome of the program. For

example, one "indicator" for better coordination among categorical programs might be a certain number of meetings held among categorical program staff to assure that efforts are being coordinated. Another "indicator" for the same outcome might be that each related program has a representative on the coalition that advises and directs the program.

State/Tribes/Territory wide: Covering the entire State/Tribes/Territory, rather than just limited 34 metropolitan or county areas within the State/Tribes/Territory. For example, State/Tribes/Territory wide comprehensive cancer control plan addresses cancer, programs, activities, and services throughout the State/Tribes/Territory.

U.S. Preventive Services Task Force Guide to Clinical Preventive Services, 2nd ed.: The Guide clearly outlines and establishes, for the clinician, the current state of research on the efficacy of the major preventive interventions. A well-specified methodology based on scientific evidence is used to assess efficacy. Based on the work of a distinguished panel of nationally recognized experts, and reviewed by more than 650 federal and nonfederal experts, it provides recommendations on screening, counseling, and immunizations according to patients' personal characteristics and health risk factors.
