SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.) NOAA is responsible for management of the Nation's marine fisheries. As part of its efforts to enforce fishery regulations, NOAA has included in some of those regulations requirements that fishing gear be marked. The ability to link gear to its owner or operator is essential for enforcement in these fisheries, and the identification of gear is also useful in actions concerning the damage or loss of gear. NOAA has previously received Paperwork Reduction Act clearance for all of its gear-marking requirements under one Office of Management and Budget (OMB) control number, 0648-0305, but for internal management reasons NOAA intends that future clearances will be obtained on a regional or fishery basis. This notice is for the requirements imposed in the Southeast Region for the following: coral aquacultured live rock; golden crab traps; reef fish traps and floats; Spanish mackerel gillnet floats; spiny lobster traps; snapper-grouper traps (pots); stone crab traps.

II. Method of Collection

Fishermen in selected fisheries must mark their fishing gear. Aquacultured live rock which is not geologically distinguishable from naturally occurring substrate must be marked or tagged. Each fish or spiny lobster trap or pot must be marked with a tag and a buoy must be used to mark the traps. Gillnets for Spanish mackerel on the east coast of Florida must be marked with floats.

Estimated Total Annual Cost to Public: \$15,275.
