SUPPLEMENTARY INFORMATION:**I. Abstract**

The International Trade Administration (ITA) sponsors up to 120 overseas trade fair events each fiscal year. In addition, there is a Matchmaker Program of approximately 20 events annually, which is a combination of multi-stop trade missions and small equipment presentations. Trade fairs involve U.S. firms exhibiting their goods and services at American pavilions at internationally recognized events worldwide. In the case of Matchmakers, ITA organizes U.S. company missions, traveling to 2 or 3 foreign locations. Matchmakers combine an exhibit booth/product presentation orientation and by-appointment-only meetings in facilities capable of accommodating 20-40 U.S. Firms. The Product Characteristics-Design Check Off List seeks from participating U.S. firms information on the physical nature, power (utility) and graphic requirements of the products and services to be displayed, and to ensure the availability of utilities active product demonstrations. This form also allows U.S. firms to identify special installation instructions that can be critical to the proper placement and hookup of their equipment and/or graphics. Without the timely and accurate submission of the Form ITA-426P, Product Characteristics—Design Check-Off Lists, ITA would be unable to provide a pavilion facility that would effectively support the sales/marketing and presentation objectives of the U.S. participants. The anticipated result: diminished program productivity, declining participation by U.S. firms, reduced private sector funds, and possibly the discontinuation of this type of U.S. international trade event program.

II. Method of Data Collection

Form ITA-426P is sent by request to U.S. firms. Applicant firms complete the form and forward it to the Department

of Commerce exhibition manager at the close of the event upon request.
