Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection

plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Proposed Project

Evaluation of Treatment Improvement Protocol (TIP) No. 24—New—Since 1992, the Center for Substance Abuse Treatment (CSAT) has published 26 Treatment Improvement Protocols (TIPs), which provide administrative and clinical practice guidance to the substance abuse treatment field. Up to six special studies will be conducted to evaluate the impact of TIPs. The first of these will evaluate the dissemination and impact of TIP No. 24—Guide to Substance Abuse Services for Primary Care Clinicians—on the clinical practices of primary care physicians and related health professionals. The information contained in the document has been published in three alternative lengths and formats: the complete TIP, a Concise Desk Reference, and a Pocket Reference Guide.

This study will examine the dissemination methods used by CSAT; the success of those methods in reaching the target audiences; users’

perceptions of the value of the alternative versions; decisions to implement the guidance presented in TIPs; and the successes, correlates, and barriers associated with implementation. The study will use a one-group posttest-only design and will survey five distinct target audiences of interest to CSAT: (1) the key administrative staff, regional representatives, and Board members of primary care associations, physician groups, and primary health care provider associations; (2) members of the American Academy of Family Physicians; (3) the American Society of Internal Medicine; (4) the American Academy of Physician Assistants; and (5) the American Nurses Association. Measures will include employment characteristics and outcomes associated with the following variables: TIP version received; awareness, receipt, and reading of the TIP; perceived utility of the TIP; and the impact of the TIP on changing clinical practices. The estimated annualized burden for a 1-year data collection period is summarized below.

	Number of respondents	Number of responses/respondent	Hours/response	Total burden hours
Opinion/leadership group	550	1	.1	55
AAFP	2100	1	.1	210
ASIM	2100	1	.1	210
APA	1650	1	.1	165
ANA	1650	1	.1	165
Total	805
