SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Convention of Antarctic Marine Living Resources a requirement had been imposed that vessels operating in certain areas of the southern oceans and fishing for finfishes, krill, or crab display the vessel's official number in a specific way. The display of the number assists law enforcement officials in monitoring fishing and other activities and to ascertain whether the vessel is participating in activities authorized for that vessel.

NOAA has previously received Paperwork Reduction Act clearance for all of its vessel-identification requirements under one Office of Management and Budget (OMB) control number, 0648-0306, but for internal management reasons NOAA intends that future clearances will be obtained on a regional or fishery basis.

II. Method of Collection

The vessel's official number must be displayed in a specified size on the port and starboard sides of the deckhouse and on a weather deck.

SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA retransmits low-resolution satellite imagery and other meteorological data to a worldwide user community having specialized electronic equipment and satellite receiving-station capabilities. Imagery and data are provided from GOES, TIROS, and METEOSAT satellites. NOAA requires a minimal amount of information from persons to determine their station location and receiving status, the satellite(s) from which they wish to receive products, and related data. Current system users are also periodically asked to update their information. The form is always available on the World-Wide-Web for users needing to change their information.
