Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project

Testing of Substance Abuse Prevention and Treatment and Mental Health Services Communication Messages—NEW—As the Federal agency responsible for developing and disseminating authoritative knowledge about substance abuse prevention, addition treatment, and mental health services and for mobilizing consumer support and increasing public understanding to overcome the stigma attached to addiction and mental illness, the Substance Abuse and Mental Health Services Administration (SAMHSA) is responsible for development and dissemination of a wide range of education and information materials for both the general public and the professional communities. This submission will provide for formative and qualitative evaluation activities to: (1) Assess audience knowledge, attitudes, behavior and other characteristics for the planning and development of messages, communication strategies and public information programs; and (2) test these messages, strategies and program

components in developmental form to assess audience comprehension, reactions and perceptions. Information

obtained from testing can then be used to improve materials and strategies while revisions are still affordable and

possible. The annual burden associated with these activities is summarized below.

Activity	Number of respondents	Responses/ respondent	Hrs./response	Total burden
Focus Groups	180	1	1.50	270
