

permitted as a de minimus air pollution source. This project will be used as a peaking unit and the de minimus permit status will be maintained by limiting the hours of operation. The number of operating hours will depend on the emission rates ultimately guaranteed by the vendor. The simple cycle gas-fired combustion turbine requires minimal water for operation. Depending on temperature and humidity conditions, there may be some water discharges from the site. Such discharges will be permitted under the Missouri National Pollutant Discharge Elimination System program.

Alternatives considered by RUS and Associated Electric Cooperative, Inc., to constructing the generation facility proposed include: (a) no action, (b) purchase of power, (c) load management, (d) construction of additional base load capacity, and (e) renewable energy.

To be presented at the public scoping meeting will be a siting and alternative study prepared by Associated Electric Cooperative, Inc. The siting and alternative study is available for public review at RUS at the address provided in this notice or at Associated Electric Cooperative, Inc., 2814 South Golden, Springfield, Missouri, 65801-0754, phone (417) 881-1204. This document will also be available at the Bloomfield Public Library which is located at 200 Seneca Street.

Government agencies, private organizations, and the public are invited to participate in the planning and analysis of the proposed project. Representatives from RUS and Associated Electric Cooperative, Inc., will be available at the scoping meeting to discuss RUS's environmental review process, describe the project and alternatives under consideration, discuss the scope of environmental issues to be considered, answer questions, and accept oral and written comments. Written comments will be accepted for at least 30 days after the public scoping meeting. Written comments should be sent to RUS at the address provided in this notice.

From information provided in the siting and alternative study, input that may be provided by government agencies, private organizations, and the public, Associated Electric Cooperative, Inc., and Burns and McDonnell will prepare an environmental analysis to be submitted to RUS for review. If significant impacts are not evident based on a review of the environmental analysis and other relevant information, RUS will prepare an environmental assessment to determine if the preparation of an EIS is warranted.

Should RUS determine that the preparation of an EIS is not warranted, it will prepare a finding of no significant impact (FONSI). The FONSI will be made available for public review and comment for 30 days. Public notification of a FONSI would be published in the **Federal Register** and in newspapers with a circulation in the project area. RUS will not take its final action related to the project prior to the expiration of the 30-day period.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with environmental review requirements as prescribed by CEQ and RUS environmental policies and procedures.

Dated: June 17, 1998.

**SUPPLEMENTARY INFORMATION:** Pursuant to Pub. L. 104-193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, American Battle Monuments Commission will disclose data from its Official Personnel Records and General Financial Records system of records to the Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services for use in the National Database of New Hires, part of the Federal Parent Locator Service (FPLS) and Federal Tax Offset System, DHHS/OCSE No. 09-90-0074. A description of the Federal Parent Locator Service may be found at 62 FR 51663 (October 2, 1997).

FPLS is a computerized network through which States may request location information from Federal and State agencies to find non-custodial parents and their employers for purposes of establishing paternity and securing support. On October 1, 1997, the FPLS was expanded to include the National Directory of New Hires, a database containing employment information on employees recently hired, quarterly wage data on private and public sector employees, and information on unemployment compensation benefits. On October 1, 1998, the FPLS will be expanded further to include a Federal Case Registry. The Federal Case Registry will contain abstracts on all participants involved in child support enforcement cases. When the Federal Case Registry is instituted, its files will be matched on an ongoing basis against the files in the National Directory of New Hires to determine if an employee is a participant in a child support case anywhere in the country. If the FPLS identifies a person as being a participant in a State child support case, that State will be notified. State requests to the FPLS for location information will also continue to be processed after October 1, 1998.

When individuals are hired by American Battle Monuments Commission, we may disclose to the FPLS their names, social security numbers, home addresses, dates of birth, dates of hire, and information identifying us as the employer. We also may disclose to FPLS names, social security numbers, and quarterly earnings of each American Battle Monuments Commission employee, within one month of the end of the quarterly reporting period.

Information submitted by American Battle Monuments Commission to the FPLS will be disclosed by the Office of

Child Support Enforcement to the Social Security Administration for verification to ensure that the social security number provided is correct. The data disclosed by American Battle Monuments Commission to the FPLS will also be disclosed by the Office of Child Support Enforcement to the Secretary of the Treasury for use in verifying claims for the advance payment of the earned income tax credit or to verify a claim of employment on a tax return.

Accordingly, the Official Personnel Records and the General Financial Records system notice is amended by addition of the following routine use:

**SUPPLEMENTARY INFORMATION:**

#### I. Abstract

The Census Bureau plans to resubmit the Survey of Plant Capacity. Data are gathered from a sample of manufacturing plants in the United States. The survey forms collect data on the value of plant production during actual operations and at full production capability.

This resubmission is to address proposed changes to the MQ-C1 form. We plan to expand one item to collect plant operations data by shift. We also plan to collect the number of temporary production workers and hours worked by temporary production workers in addition to the total number of production workers and hours worked.

In the 1997 survey, the reference period covers the fourth quarter of the survey year only rather than the fourth quarter of the survey year and the prior year. This change decreased the respondent burden from 2 hours to 1.25 hour per respondent. Based on discussions with potential respondents, we estimate that the new data will require about 1.5 hours to complete. Therefore we estimate the total respondent burden to complete the revised form to be 2.75 hours.

The survey data are used in measuring inflationary pressures and capital flows, in understanding productivity determinants, and in analyzing and forecasting economic and industrial trends. The survey results are used by such agencies as the Federal Reserve Board, Federal Emergency Management Agency, International Trade Administration, and the Department of Defense.

#### II. Method of Collection

The Census Bureau mails out survey forms to collect the data. Companies are asked to respond to the survey within 30 days of the initial mailing. Letters encouraging participation are mailed to companies that have not responded by the designated time.
