The Secretary of the Interior has identified this as a high priority project and action is being expedited due to the worsening conditions at the Sea. Over 200,000 birds have died at the Sea over the past six years as a result of the current conditions. Reclamation and the Authority will be working closely with interested Congressional members and other stakeholders to develop possible solutions.

A Research Management Committee (Committee) has been established of high-level managers from the U.S. Department of the Interior, Authority, State of California, and the Torres Martinez Desert Cahuilla Indians. This Committee makes funding and other relevant decisions regarding science to be funded to support the CEQA/NEPA process. A Science Subcommittee (Subcommittee) has been established to serve as an advisory committee to provide scientific evaluations and recommendations to the Committee. The Subcommittee functions as a coordinated body to determine information gaps, identify science/information needs, and provide the Committee with recommendations for funding priorities regarding the science activities.

The draft EIR/EIS is expected to be completed by the end of December 1999.
