Moratorium on Issuance of New Commercial Permits and Rights-of-Way in Mill Creek Canyon**AGENCY:** Bureau of Land Management, Department of Interior.

ACTION: Notice of moratorium on authorization of new commercial permits and rights of way for Mill Creek Canyon pending completion of a special management plan.

SUMMARY: This notice places a moratorium on issuance of all new commercial permits including new special recreation and filming permits and rights of way authorized by the Moab Field Office for Mill Creek Canyon near Moab, Utah. This action is implemented under the authority of 43 CFR 2800, 2920 and 8372.

Increased recreation and other use of public lands in Mill Creek Canyon has adversely impacted wildlife, vegetation, soil, water quality, visual and cultural resources and poses a threat to public health and safety and enjoyment of the lands. This area encompasses lands under BLM management within one-quarter (1/4) mile of the stream, from the public land boundary west of the Power Dam to the Forest Service boundary, in both forks of the canyon including Rill Canyon.

The purpose and need for preparation of a special management plan for the area has been determined through public scoping. To prevent foreclosure of management options in that plan, issuance of additional special recreation and filming permits, rights-of-way, and all other commercial use permits is hereby suspended. Limiting new permits is one way to control future resource damage, ensure the sustainability of existing resources, and allow unhindered consideration and possible adoption of use ceilings, pending completion of the management plan.
