the cash deposit rate will continue to be the company-specific rate published for the most recent period;

(3) If the exporter is not a firm covered in these reviews, a prior review, or the less-than-fair-value investigations, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and

(4) If neither the exporter nor the manufacturer is a firm covered in these or any previous reviews conducted by the Department, the cash deposit rate for the A–588–054 case will be 18.07 percent, and 36.52 percent for the A–588–604 case (*see Final Results of Antidumping Duty Administrative Reviews; Tapered Roller Bearings, Finished and Unfinished, and Parts Thereof, from Japan and Tapered Roller Bearings, Four Inches or less in Outside Diameter, and Components Thereof, From Japan,* 58 FR 64720 (December 9, 1993)).

This notice serves as a preliminary reminder to importers of their responsibility to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This determination is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213.

Dated: July 2, 1998.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Montana State University-Bozeman; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 98–010. Applicant: Montana State University-Bozeman, Bozeman, MT 59717. Instrument: Optical Helium Cryostat. Manufacturer: Institute of Physics, National Academy of Sciences of Ukraine, C.I.S. Intended Use: See notice at 63 FR 12451, March 13, 1998.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: (1) Rapid cool-down (30–60 min.), (2) minimal initial vacuum (10^{-3} Torr), (3) portable operation and (4) low evaporation (2–3 liters per cooling cycle). The National Institute of Standards and Technology advised June 25, 1998 that (1) These capabilities are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

Stanford University; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 97–095R. Applicant: Stanford University, Palo Alto, CA 94304. Instrument: Ultrasound Bone Densitometer. Manufacturer: McCue Plc, United Kingdom. Intended Use: See notice at 62 FR 65679, December 15, 1997.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: (1) Reduced transducer size (½ inch) appropriate for use with children's feet, (2) external calipers for precise placement of the transducers and (3) available normative standards from studies indicating a precision of 3–5% for repeated measurements. These capabilities are pertinent to the applicant's intended purposes and we know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

University of Texas at Austin, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 97–086R. Applicant: University of Texas at Austin, 78712. Instrument: 3–D Motion Analysis System, Model Vicon 140. Manufacturer: Oxford Metrics, Ltd., United Kingdom. Intended Use: See notice at 62 FR 53594, October 15, 1997. Reasons: The foreign instrument provides precise time-matched data collection for analog samples and video motion data by using a single clock and phase-locking analog signals with the motion data. Advice received from: National Institutes of Health, June 8, 1998.

Docket Number: 98–016. Applicant: University of Wisconsin-Madison, Madison, WI 53706–1490. Instrument: High Speed Length Controller, Model 308B. Manufacturer: Crystallox, Ltd., United Kingdom. Intended Use: See notice at 63 FR 15831, April 1, 1998. Reasons: The foreign instrument
