SUPPLEMENTARY INFORMATION:

I. Background

Public Law 104-208 enacted on September 30, 1996 contains the Library Services and Technology Act, a reauthorization and refocusing of federal library programs. This legislation retains the state-based approach to library programs and sharpens the focus to two key priorities: information access through technology and information empowerment through special services.

Public Law 104-208 authorizes the Director of the Institute of Museum and Library Services to make grants to States to assist them to—

- (1) Consolidate Federal library service programs;
- (2) Stimulate excellence and promote access to learning and information resources in all types of libraries for individuals of all ages;
- (3) Promote library services that provide all users access to information through State, regional, national and international electronic networks;
- (4) Provide linkages among and between libraries;
- (5) Promote targeted library services to people of diverse geographic, cultural, and socioeconomic backgrounds, to individuals with disabilities, and to people with limited functional literary or information skills.

II. Current Actions

This is a new information collection. The annual report is needed to assess outcome of awards as needed for compliance with the Government Performance and Results Act.
