

and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendments under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendments are issued before the expiration of the 30-day hearing period, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Mr. J. Michael McGarry, III, Winston and Strawn, 1200 17th Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated July 8, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room, located at the Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina.

Dated at Rockville, Maryland, this 13th day of July 1998.

For the Nuclear Regulatory Commission.

David E. LaBarge,

Senior Project Manager Project Directorate II-2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

Knowledge and Abilities Catalog Revision; Notice of Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: NUREG-1122, "Knowledge and Abilities Catalog for Nuclear Power Plant Operators: Pressurized Water Reactors," and NUREG-1123, "Knowledge and Abilities Catalog for Nuclear Power Plant Operators: Boiling Water Reactors," were developed in 1985 to assist operator licensing examiners in the development of content valid written and operating examinations to administer to reactor plant operators and senior operators. The Knowledge and Abilities (K/A) catalogs were revised in 1995 to resolve inconsistencies between the two catalogs and inconsistencies in content within the K/A catalogs. Revision 1 also incorporated evolutionary changes in the operator licensing program and revised definition of operator's tasks within facility licensee's organizations.

The current Revision 2 incorporates corrections to the Revision 1 catalogs that were identified during examination development associated with a proposed revision of 10 CFR 55 and implementation of NUREG-1021,

Interim Rev. 8, "Operator Licensing Examination Standards for Power Reactors." Revision 2 of the respective K/A catalogs has been prepared for use in conjunction with the implementation of NUREG-1021, final Revision 8, but may be used immediately.

Copies of NUREG-1122, Revision 2 and NUREG-1123, Revision 2 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013-7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for inspection and/or copying for a fee in the NRC Public Document Room. These documents are also available at the NRC Web Site, <http://www.nrc.gov>. See the links under "Technical Reports in the NUREG Series" on the "Reference Library" page.

FOR FURTHER INFORMATION CONTACT:

Frank Collins, Mail Stop O9-D24, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, telephone (301) 415-3173.

Dated at Rockville, Maryland, this 9th day of July, 1998.

For the Nuclear Regulatory Commission.

Richard J. Eckenrode,

Acting Chief, Operator Licensing and Human Performance Branch, Division of Reactor Controls and Human Factors, Office of Nuclear Reactor Regulation.
