The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Menomonie, WI, to accommodate aircraft executing the proposed GPS Rwy 27 SIAP at Menomonie Municipal-Score Field Airport by increasing the radius of the existing controlled airspace for the airport. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing the approach. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9E dated September 10, 1997, and effective September 16,

1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Alteration of Federal Airways V-19, V-148, and V-263; Colorado

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; withdrawal.

SUMMARY: This action withdraws the notice of proposed rulemaking (NPRM) published in the **Federal Register** on August 2, 1995. The NPRM proposed to realign three Federal airways located in Colorado (CO), when the Byers, CO, Very High Frequency Omnidirectional Range/Distance measuring Equipment (VOR/DME) became operational as part of the new Denver Airport airspace realignment. The FAA has determined that withdrawal of the proposal is warranted due to an in-flight aeronautical evaluation (flight check) which revealed that the proposed airways would not meet FAA designed criteria.

DATES: The withdrawal is effective July 24, 1998.
