This rule proposes to add 14 new sites to the NPL, 11 to the General Superfund section and 3 to the Federal facilities section.

DATES: Comments regarding any of these proposed listings must be submitted (postmarked) on or before September 28, 1998, EPA has changed its policy and will normally no longer respond to late comments.

ADRESSES: By Postal Mail: Mail original and three copies of comments (no facsimiles or tapes) to Docket Coordinator, Headquarters; U.S. EPA; CERCLA Docket Office; Mail Code 5201G; 401 M Street, SW; Washington, DC 20460; 703/603-9232.

By Express Mail: Send original and three copies of comments (no facsimiles or tapes) to Docket Coordinator, Headquarters; U.S. EPA; CERCLA Docket Office; 1225 Jefferson Davis Highway; Crystal Gateway #1, First Floor; Arlington, VA 22202.

By E-Mail: Comments in ASCII format only may be mailed directly to SUPERFUND.DOCKET@EPA.GOV. E-mailed comments must be followed up by an original and three copies sent by mail or Federal Express.

For additional Docket addresses and further details on their contents, see Section II, “Public Review/Public Comment,” of the Supplementary Information portion of this preamble.

FOR FURTHER INFORMATION CONTACT: Terry Keidan, phone (703) 603-8852, State, Tribal, and Site Identification Center, Office of Emergency and Remedial Response (Mail Code 5204G), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC, 20460, or the Superfund Hotline, Phone (800) 424-9346 or (703) 412-9810 in the Washington, DC, metropolitan area.

What is Executive Order 12875 and is it applicable to this proposed rule?

I. Background

What Are CERCLA and SARA?

What Is the NCP?
To implement CERCLA, EPA promulgated the revised National Oil and Hazardous Substances Pollution Contingency Plan ("NCP"), 40 CFR Part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets guidelines and procedures for responding to releases and threatened releases of hazardous substances, pollutants, or contaminants under CERCLA, EPA has revised the NCP on several occasions. The most recent comprehensive revision was on March 8, 1990 (55 FR 8666).

As required under Section 105(a)(8)(A) of CERCLA, the NCP also includes "criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable, taking into account the potential urgency of such action for the purpose of taking removal action." ("Removal" actions are defined broadly and include a wide range of actions taken to study, clean up, prevent or otherwise address releases and threatened releases 42 USC 9601(23).)

What Is the National Priorities List (NPL)?
The NPL is a list of national priorities among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The list, which is Appendix B of the NCP (40 CFR part 300), was required under section 105(a)(8)(B) of CERCLA, as amended by SARA. Section 105(a)(8)(B) defines the NPL as a list of "releases" and the highest priority "facilities" and requires that the NPL be revised at least annually. The NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a release of hazardous substances. However, the NPL is only of limited significance, as it does not assign liability to any party or to the owner of any specific property. Neither does placing a site on the NPL mean that any remedial or removal action necessarily need be taken. See Report of the Senate Committee on Environment and Public Works, Senate Rep. No. 96–848, 96th Cong., 2d Sess. 60 (1980), 48 FR 40659 (September 8, 1983).

The NPL includes two sections, one of sites that are evaluated and cleaned up by EPA (the "General Superfund Section"), and one of sites being addressed generally by other Federal agencies (the "Federal Facilities Section"). Under Executive Order 12580 (52 FR 2923, January 29, 1987) and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody, or control, although EPA is responsible for preparing an HRS score and determining whether the facility is placed on the NPL. EPA generally is not the lead agency at Federal Facilities Section sites, and its role at such sites is accordingly less extensive than at other sites.

How Are Sites Listed on the NPL?
There are three mechanisms for listing sites on the NPL for possible remedial action (see 40 CFR 300.425(c) of the NCP):

1. A site may be included on the NPL if it scores sufficiently high on the Hazard Ranking System ("HRS"), which EPA promulgated as Appendix A of the NCP (40 CFR Part 300). The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances to pose a threat to human health or the environment. On December 14, 1990 (55 FR 15132), EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. The revised HRS evaluates four pathways: Ground water, surface water, soil exposure, and air. As a matter of Agency policy, those sites that score 28.50 or greater on the HRS are eligible for the NPL.

2. Each State may designate a single site as its top priority to be listed on the NPL, regardless of the HRS score. This mechanism, provided by the NCP at 40 CFR 300.425(c)(2) requires that, to the extent practicable, the NPL include within the 100 highest priorities, one facility designated by each State representing the greatest danger to public health, welfare, or the environment among known facilities in the State (see 42 U.S.C. 9605(a)(8)(B)).

3. The third mechanism for listing, included in the NCP at 40 CFR 300.425(c)(3), allows certain sites to be listed regardless of their HRS score, if all of the following conditions are met:

   (i) The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends dissociation of individuals from the release.
   
   (ii) EPA determines that the release poses a significant threat to public health.
   
   (iii) EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

   EPA promulgated an initial NPL of 406 sites on September 8, 1983 (48 FR 40658). The NPL has been expanded since then, most recently on March 6, 1998 (63 FR 11331).

   What Happens to Sites on the NPL?

A site may undergo remedial action financed by the Trust Fund established under CERCLA (commonly referred to as the "Superfund") only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1). ("Remedial actions" are those "consistent with permanent remedy, taken instead of or in addition to removal actions." (42 U.S.C. 9601(24).) However, under 40 CFR 300.425(b)(2) placing a site on the NPL "does not imply that monies will be expended." EPA may pursue other appropriate authorities to remedy the releases, including enforcement action under CERCLA and other laws.

   How Are Site Boundaries Defined?

   The NPL does not describe releases in precise geographical terms; it would be...
information is developed on site contamination (40 CFR 300.430(d)). During the RI/FS process, the release may be found to be larger or smaller than was originally thought, as more is learned about the source(s) and the migration of the contamination. However, this inquiry focuses on an evaluation of the threat posed; the boundaries of the release need not be exactly defined. Moreover, it generally is impossible to discover the full extent of where the contamination “has come to be located” before all necessary studies and remedial work are completed at a site. Indeed, the boundaries of the contamination can be expected to change over time. Thus, in most cases, it may be impossible to describe the boundaries of a release with absolute certainty.

Further, as noted above, NPL listing does not assign liability to any party or to the owner of any specific property. Thus, if a party does not believe it is liable for releases on discrete parcels of property, supporting information can be submitted to the Agency at any time after a party receives notice it is a potentially responsible party. For these reasons, the NPL need not be amended as further research reveals more information about the location of the contamination or release.

How Are Sites Removed From the NPL?

EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e). This section also provides that EPA shall consult with states on proposed deletions and shall consider whether any of the following criteria have been met:

(i) Responsible parties or other persons have implemented all appropriate response actions required;
(ii) All appropriate Superfund-financed response has been implemented and no further response action is required; or
(iii) The remedial investigation has shown the release poses no significant threat to public health or the environment, and taking of remedial measures is not appropriate.

To date, the Agency has deleted 175 sites.

II. Public Review/Public Comment

Can I Review the Documents Relevant to This Proposed Rule?

Yes, the documents that form the basis for EPA’s evaluation and scoring of sites in this rule are contained in dockets located both at EPA Headquarters in Washington, D.C. and in the appropriate Regional offices.

How Do I Access the Documents?

You may view the documents, by appointment only, in the Headquarters or the appropriate Regional docket after the appearance of this proposed rule. The hours of operation for the Headquarters docket are from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Please contact individual Regional dockets for hours.

You may also request copies from EPA Headquarters or the appropriate Regional docket. An informal request, rather than a formal written request under the Freedom of Information Act, should be the ordinary procedure for obtaining copies of any of these documents.

Following is the contact information for the EPA Headquarters docket (see “How do I submit my comments?” section below for Regional contacts):
Docket Coordinator, Headquarters, U.S. EPA...
III. Contents of This Proposed Rule

Proposed Additions to the NPL

Table 1 identifies the 11 sites in the General Superfund section being proposed to the NPL in this rule. Table 2 identifies the 3 sites in the Federal Facilities section being proposed to the NPL in this rule. These tables follow this preamble. All sites are proposed based on HRS scores of 28.50 or above. The sites in Table 1 and Table 2 are listed alphabetically by State, for ease of identification, with each site being identified to provide an indication of relative ranking. To determine group number, sites on the NPL are placed in groups of 50; for example, a site in Group 4 of this proposal has an HRS score that falls within the range of scores covered by the fourth group of 50 sites on the NPL.

Status of NPL

A final rule published elsewhere in today’s Federal Register, results in an NPL of 1,193 sites, 1,040 in the General Superfund Section and 9 in the Federal Facilities Section. With this proposal of 14 new sites, there are now 1,249 sites now total 1,249.

Withdrawal of 3 Sites From Proposal to the NPL

EPA is withdrawing the following three sites from proposal to the NPL: Cross County Sanitation Landfill in Patterson, New York; Lincoln Cresosote...
in Bossier City, Louisiana; and Monarch Tile Manufacturing, Inc. in Florence, Alabama.

IV. Executive Order 12866

What Is Executive Order 12866?

Executive Order 12866 requires certain regulatory assessments for any "economically significant regulatory action," defined as one which would result in an annual effect on the economy of $100 million or more, or have other substantial impacts.

Is This Proposed Rule Subject to Executive Order 12866 Review?

No, this is not an economically significant regulatory action; therefore, the Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866 review.

V. Unfunded Mandates

What Is the Unfunded Mandates Reform Act (UMRA)?

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal Agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under Section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. Before EPA promulgates a rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

Does UMRA Apply to This Proposed Rule?

No, EPA has determined that this rule does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate. This rule will not impose any Federal intergovernmental mandate because it imposes no enforceable duty upon State, tribal, or local governments. Listing a site on the NPL does not itself impose any costs. Listing does not mean that EPA necessarily will undertake remedial action. Nor does listing require any action by a private party or determine liability for response costs. Costs that arise out of site reponses result from site-specific decisions regarding what actions to take, not directly from the act of listing a site on the NPL.

For the same reasons, EPA also has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments. In addition, as discussed above, the private sector is not expected to incur costs exceeding $100 million. EPA has fulfilled the requirement for analysis under the Unfunded Mandates Reform Act.

VI. Effect on Small Businesses

What Is the Regulatory Flexibility Act?

The Regulatory Flexibility Act of 1980 requires EPA to review the impacts of this action on small entities, or certify that the action will not have a significant impact on a substantial number of small entities. EPA considers many factors when determining enforcement actions, including not only a firm’s contribution to the problem, but also its ability to pay. The impacts (from cost recovery) on small governments and nonprofit organizations would be determined on a similar case-by-case basis.

For the foregoing reasons, I hereby certify that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. Therefore, this proposed regulation does not require a regulatory flexibility analysis.

VII. National Technology and Advancement Act

What Is the National Technology and Advancement Act?

Section 12(d) of the National Technology and Advancement Act of 1995 (NTTAA), Public Law 104–113, directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, business practices, etc.) that are developed or adopted by voluntary consensus standards bodies. The NTTAA requires EPA to provide Congress, through OMB explanations when the Agency decides not to use available and applicable voluntary consensus standards.

Does the National Technology and Advancement Act Apply to This Proposed Rule?

EPA is not proposing any new test methods or other technical standards as part of today’s rule, which proposes to add sites to the NPL. Thus, the Agency...
does not need to consider the use of voluntary consensus standards in developing this proposed rule. EPA invites public comment on this analysis.

**VIII. Executive Order 13045**

What Is Executive Order 13045?

On April 21, 1997, the President issued Executive Order 13045 entitled Protection of Children From Environmental Health Risks and Safety Risks (62 FR 19883). Under section 5 of the Order, a federal agency submitting a “covered regulatory action” to OMB for review under Executive Order 12866 must provide information regarding the environmental health or safety effects of the planned regulation on children. A “covered regulatory action” is defined in section 2-202 as a substantive action in a rulemaking, initiated after the date of this order or for which a Notice of Proposed Rulemaking is published 1 year after the date of this order, that is likely to result in a rule that may be “economically significant” under Executive Order 12866 and concern an environmental health risk or safety risk that an agency has reason to believe may disproportionately affect children.

Does Executive Order 13045 Apply to This Proposed Rule?

This proposed rule is not a “covered regulatory action” as defined in the Order and accordingly is not subject to section 5 of the Order. As discussed above this proposed rule does not constitute economically significant action (i.e., it is not expected to have an annual adverse impact of $100 million or more) under Executive Order 12866. Further, this rule does not concern an environmental health risk or safety risk that disproportionately affects children.

**IX. Paperwork Reduction Act**

What is the Paperwork Reduction Act?

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 et seq., an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB.

The information collection requirements related to this action have already been approved by OMB pursuant to the PRA under OMB control number 2070-0012 (EPA ICR No. 574).

Does the Paperwork Reduction Act Apply to This Proposed Rule?

This action does not impose any burden requiring OMB approval under the Paperwork Reduction Act.

**X. Executive Order 12875**

What is Executive Order 12875 and is it Applicable to This Proposed Rule?

Enhancing the Intergovernmental Partnership—This proposed rule does not impose any enforceable duty or contain any unfunded mandate that would require any prior consultation with State, local or tribal officials under Executive Order 12875.
