SUPPLEMENTARY INFORMATION:

Federal Aviation Administration (FAA)

Title: Fuel Venting and Exhaust Emission Requirements for Turbine Engine Powered Airplanes.

OMB Control Number: 2120-0508.

Form(s): N/A.

Type of Request: Revision of a currently approved collection.

Affected Public: Business or other for profit.

Abstract: This is a labeling requirement to put the date of manufacture and compliance status on the identification plate and is intended to minimize the effort required to determine whether a turbojet engine may legally be installed and operate on a aircraft in the United States as required by 14 CFR part 45.

Estimated Burden: The estimated total annual burden is 100 hours.

ADDRESSES: Written comments on the DOT information collection request should be forwarded, within 30 days of publication, to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10102, Washington, DC 20503, ATTN: FAA Desk Officer. Written comments to OMB are best assured of having their full effect when OMB receives them within 30 days of publication. If you anticipate submitting substantive comments, but find that more than 10 days from the date of publication are needed to prepare them, please notify the OMB official of your intent immediately.

Comments are invited on: Whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collections; ways to enhance the quality, utility and clarity

of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued in Washington, DC, on July 27, 1998.
