Increasing Transparency for the Tolerance Reassessment Process; Availability of Preliminary Risk Assessments for Nine Organophosphates

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This Notice announces the availability of documents which were developed as part of EPA's process for making reregistration eligibility decisions for the organophosphate pesticides and for tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the preliminary risk assessments and related documents for azinphos-methyl, bensulide, ethion, fenamiphos, isofenphos, naled, phorate, profenofos, and terbufos. This Notice also starts a 60-day public comment period for the preliminary risk assessments. Comments are to be limited to issues directly associated with the nine organophosphates that have risk assessments placed in the docket and should be limited to issues raised in those documents. EPA will provide opportunity for comment on the hazard assessments and FQPA safety factor assessments for the other organophosphates at a later date. Opportunity for public comment will also be provided at a later date for a variety of science issues. Allowing access and comments on the preliminary risk assessments will strengthen stakeholder involvement and help ensure the Agency's decisions under FQPA are transparent, and based on the best available information. The tolerance reassessment process will ensure that the U.S. continues to have the safest and most abundant food supply. The Agency cautions that these risk assessments are preliminary assessments only and that further

refinements of the risk assessments will be appropriate for some, if not all, of these nine pesticides. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

DATES: Written comments on these assessments must be submitted by October 13, 1998.

ADDRESSES: By mail, submit written comments in triplicate to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 119, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically to: opp-docket@epamail.epa.gov. Follow the instructions under Unit II. of this document. No Confidential Business Information (CBI) should be submitted through e-mail.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in Rm. 119 at the Virginia address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

To request a copy of any of the above listed preliminary risk assessments and related documents, contact the OPP Pesticide Docket, Public Information and Records Integrity Branch, in Rm. 119 at the address given above or call (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Karen Angulo, Special Review and Reregistration Division (7508W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. SUPPLEMENTARY INFORMATION:

I. Background

EPA is making available preliminary risk assessments which have been developed as part of EPA's process for making reregistration eligibility decisions for the organophosphate pesticides and for tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act as amended by the Food Quality Protection Act of 1996 (FQPA). The Agency's preliminary health effects risk assessments for the following nine organophosphate pesticides are available in the individual pesticide dockets: azinphos-methyl, bensulide, ethion, fenamiphos, isofenphos, naled, phorate, profenofos, and terbufos. In addition, the preliminary ecological effects risk assessments for bensulide, ethion, fenamiphos, isofenphos, naled, phorate, profenofos, and terbufos have also been docketed. The Hazard Assessment of the Organophosphates and FQPA Safety Factor Recommendations for the Organophosphates have also been included in the docket to help the public in their review of the preliminary risk assessments.

Included in the individual pesticide dockets are the Agency's preliminary risk assessments, the registrants' comments to this point, and any successive Agency reviews or related correspondence regarding the Agency's risk assessment. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for the above nine organophosphate pesticides. The Agency cautions that these risk assessments are preliminary assessments only and that further refinements of the risk assessments will be appropriate for some, if not all, of these nine pesticides. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

As the preliminary risk assessments for the remaining organophosphate pesticides are completed and registrants are given a 30-day review period to identify possible computational or other clear errors in the risk assessment, these risk assessments and registrant responses will be placed in the individual pesticide dockets. A Notice of Availability for subsequent assessments will appear in the **Federal Register**.

To provide users with the most recent information on the nine

organophosphates, EPA has also included in each docket the Agency's July 7, 1998 "Hazard Assessment of the Organophosphates" and the Agency's August 6, 1998 "FQPA Safety Factor Recommendations for the Organophosphates." In general, these two documents were completed after the nine individual pesticide preliminary risk assessments discussed above. The Agency notes that where the preliminary risk assessments are inconsistent with the Hazard Assessment and FQPA Safety Factor Recommendation these latter assessments will supersede the relevant portions of the preliminary risk assessments and will be incorporated into the revised individual pesticide risk assessments. The Agency also notes that these documents reflect only the work and analysis conducted as of the time they were produced, and as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

The Agency is providing an opportunity, through this Notice, for interested parties to provide written comments and input to the Agency on the preliminary risk assessments for the chemicals specified in this Notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as percent crop treated information or submission of residue data from food processing studies, or could address the Agency's risk assessment methodologies and assumptions as applied to these specific chemicals. Comments should be limited to issues raised within the preliminary risk assessments and associated documents. EPA will provide other opportunities for public comment on other science issues associated with the organophosphate tolerance reassessment program. Failure to comment on any such issues as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments should be submitted by October 13, 1998 at the address given above. Comments will become part of the Agency record for each individual pesticide to which they pertain.
