NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

TITLE OF COLLECTION: NSF–OMB Follow-Up Survey: Science and Engineering Research Facilities at Colleges and Universities (OMB Control No. 3145–0101).

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting OMB clearance of this collection for no longer than 3 years.

SEND COMMENTS TO: F. Neville Withington, Acting Reports Clearance Officer, National Science Foundation,

4201 Wilson Boulevard, Suite 245, Arlington, Virginia 22230 or send email to fwithing@nsf.gov. Written comments should be received within 60 days of the date of this notice.

FOR FURTHER INFORMATION CONTACT:

Ms. Withington on (703) 306–1126 x2004 or send email to fwithing@nsf.gov. You may also obtain a copy of the data collection instrument and instructions from Ms. Withington.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: The 1998 Survey of Science and Engineering Research Facilities at Colleges and Universities conducted by NSF collected data on the status of academic science and engineering (S&E) research facilities. The proposed follow-up survey will collect additional information to supplement the original survey data, increasing its usefulness to Federal agencies, policymakers and higher education administrators. Total project construction costs which exceed \$25 million per project will be reported and particular space designation measurements (gross square feet and net assignable square feet) of the building will be identified. Additional questions regarding special features or conditions which might contribute to prices beyond standard expectations are also included in the questionnaire.

Use of Information: The availability of these data will allow universities to prepare a comparison of their costs for construction with the data collected in the initial NSF Facilities survey. The follow-up study, by focusing on costs segmented by project, requiring exact space designations, and taking into account any specialized project features, thereby improving the precision of analysis of large research facility costs, will allow Federal policymakers, planners, and budget analysts, as well as academic officials and state agencies, to make more exact and, as a result, more valid judgments concerning the reasonableness of facility costs.

Burden on the Public: We estimate a total of 75 colleges and universities will be screened for the survey, and expect approximately one-half of these to be eligible for the follow-up study.

Approximately one hour will be required for each qualifying institution to respond, for a total of 38 hours of annual burden.

Dated: August 17, 1998.

F. Neville Withington,

Acting Reports Clearance Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-461]

Illinois Power Co., Clinton Power Station, Unit 1; Notice of Partial Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has

partially denied a request by Illinois Power Company (the licensee) to amend Facility Operating License NPF-62 issued to the licensee for operation of the Clinton Power Station, Unit 1, located in DeWitt County, Illinois. Notice of Consideration of Issuance of the amendment was published in the **Federal Register** on December 20, 1995 (60 FR 65681).

The purpose of the licensee's amendment request was to revise Technical Specification (TS) 5.2.2.e, "Unit Staff," by revising the requirements for controls on the working hours of unit staff who perform safety related functions and by removing the requirement for monthly review of individual overtime.

The proposed changes were denied in part. The licensee's request to remove the monthly review of individual overtime requirement was denied because this removal would result in working hours controls that would not be sufficient to assure that adequate shift coverage is maintained without routine heavy use of overtime.

The NRC staff has concluded that part of the licensee's request cannot be granted. The licensee was notified of the Commission's partial denial of the proposed change by letter dated August 13, 1998.

By September 21, 1998, the licensee may demand a hearing with respect to the partial denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene. A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Leah Manning Stetzner, Vice President, General Counsel, and Corporate Secretary, 500 South 27th Street, Decatur, IL 62525, attorney for the licensee.

For further details with respect to this action, see (1) the application for amendment dated October 27, 1995, and (2) the Commission's letter to the licensee dated August 13, 1998.

These documents are available for public inspection at the Commission's Public Document Room and at the local public document room located at the

Vespasian Warner Public Library, 120 West Johnson Street, Clinton, IL 61727.

Dated at Rockville, MD, this 13th day of August 1998.

For the Nuclear Regulatory Commission.

Jon B. Hopkins,

Senior Project Manager, Project Directorate III-3, Division of Reactor Projects—III/IV, Office of Nuclear Reactor Regulation.
