The definition of Material Damage means purchase, lease, or option of the land for the purpose of conducting or allowing through resale, lease, or option, the conduct of surface coal mining and reclamation operations.

The definition of Cropland means land that: (a) Has been used for cropland for any of five years or more of the ten years immediately preceding the application or acquisition of the land for the purpose of conducting a surface coal mining and reclamation operation; (b) would likely have been used for cropland for any of the five years immediately preceding the acquisition or application, but for some fact of ownership or control of the land unrelated to the productivity of the land; (c) falls outside the five of ten years criteria, but the cabinet determines is clearly cropland on the basis of additional cropland history of years criteria, but the cabinet determines is clearly cropland on the basis of additional cropland history of (1) surrounding land, and (2) the land.

The definition of Institutional Building is slightly revised from the original submission to clarify "for another public service" as a possible use. The word "primarily" is also deleted to describe the listed uses.

Historically Used for Cropland means that: (a) Has been used for cropland for any of five years or more of the ten years immediately preceding the application or acquisition of the land for the purpose of conducting a surface coal mining and reclamation operation; (b) would likely have been used for cropland for any of the five years immediately preceding the acquisition or application, but for some fact of ownership or control of the land unrelated to the productivity of the land; (c) falls outside the five of ten years criteria, but the cabinet determines is clearly cropland on the basis of additional cropland history of (1) surrounding land, and (2) the land.

The definition of Material Damage is revised from the original submission to delete the reference to 405 KAR 18:210.
Kentucky is also adding a new section 2 (Incorporation by Reference) to incorporate: "ASTM Standard D 388-77, Standard Specification for Classification of Coals by Rank," (1977), American Society for Testing and Materials. The address where the document may be inspected, copied, or obtained is provided.

At section 8:030—Surface Coal Mining Permits, Kentucky cites KRS 350.028(1),(5), 350.060(3), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations.

Kentucky is deleting subsection 4(3) which states, “Nothing in this section shall be construed to afford the cabinet the authority to adjudicate property title disputes.”

At subsection 12(4), Kentucky is requiring that water quality analysis and sampling be conducted according to: “Standard Methods for the Examination of Water and Wastewater,” or 40 CFR Parts 136 and 434.

At subsection 20(3), Kentucky is requiring that wetlands delineations be conducted in accordance with: Corps of Engineers Wetlands Delineation Manual and Regulatory Guidance Letter #90-7, “National Lists of Plant Species that Occur in Wetlands and Biological Reports and Summary”, and “List of Hydric Soils of the U.S.”

At subsection 32(3)(e), Kentucky is modifying its original submission language to state, “The determination shall include a finding on whether the proposed surface mining activities may proximately result in contamination, diminution or interruption of an underground or surface source of water within the permit area or adjacent area that is used for domestic, agricultural, industrial or other legitimate use.”

Kentucky is adding new subsection 38 (Incorporation by Reference) to incorporate: "Corps of Engineers Wetlands Manual and Regulatory Guidance Letter #90-7, “National Lists of Plant Species that Occur in Wetlands and Biological Reports and Summary,” and “List of Hydric Soils of the U.S.”

At subsection 26(1)(d) 1 and 2, Kentucky is requiring that a permit application include a survey of the quantity and quality of each water supply for domestic, agricultural, industrial, or other legitimate use within the permit area and adjacent area that could be contaminated, diminished, or interrupted by subsidence. If the applicant cannot make this survey because the owner will not allow access to the site, the applicant shall include documentation of the denial of access. The applicant shall pay for its technical assessment or engineering evaluation used to determine the quantity and quality of a water supply for domestic, agricultural, industrial, or other legitimate use. The applicant shall provide copies of the survey and any technical assessment or engineering evaluation to the property owner and the cabinet. If the owner or his/her representative is present at the time a survey, technical assessment, or engineering evaluation is conducted, the surveyor shall include the name of the person. If the owner disagrees with the results, he/she may submit in writing to the cabinet and permittee, a detailed description of the specific areas of disagreement. The cabinet may require additional measure to ensure that adequate and accurate information is included and to ensure compliance with 405 KAR 18:210.

At subsection 32(3)(e), Kentucky is modifying its original submission language to state, “The determination shall include a finding on whether the proposed underground mining activities conducted after July 16, 1994, may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the permit area or adjacent areas that is used for domestic, agricultural, industrial, or other legitimate use.”

Kentucky is adding new subsection 26 (Incorporation by Reference) to incorporate: "Corps of Engineers Wetlands Manual and Regulatory Guidance Letter #90-7, “National Lists of Plant Species that Occur in Wetlands and Biological Reports and Summary,” and “List of Hydric Soils of the U.S.”

At subsection 26(1)(d) 1 and 2, Kentucky is requiring that a permit application include a survey of the quantity and quality of each water supply for domestic, agricultural, industrial, or other legitimate use within the permit area and adjacent area that could be contaminated, diminished, or interrupted by subsidence. If the applicant cannot make this survey because the owner will not allow access to the site, the applicant shall include documentation of the denial of access. The applicant shall pay for its technical assessment or engineering evaluation used to determine the quantity and quality of a water supply for domestic, agricultural, industrial, or other legitimate use. The applicant shall provide copies of the survey and any technical assessment or engineering evaluation to the property owner and the cabinet. If the owner or his/her representative is present at the time a survey, technical assessment, or engineering evaluation is conducted, the surveyor shall include the name of the person. If the owner disagrees with the results, he/she may submit in writing to the cabinet and permittee, a detailed description of the specific areas of disagreement. The cabinet may require additional measure to ensure that adequate and accurate information is included and to ensure compliance with 405 KAR 18:210.

At subsection 32(3)(e), Kentucky is modifying its original submission language to state, “The determination shall include a finding on whether the proposed underground mining activities conducted after July 16, 1994, may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the permit area or adjacent areas that is used for domestic, agricultural, industrial, or other legitimate use.”

Kentucky is adding new subsection 26 (Incorporation by Reference) to incorporate: "Corps of Engineers Wetlands Manual and Regulatory Guidance Letter #90-7, “National Lists of Plant Species that Occur in Wetlands and Biological Reports and Summary,” and “List of Hydric Soils of the U.S.”

At subsection 26(1)(d) 1 and 2, Kentucky is requiring that a permit application include a survey of the quantity and quality of each water supply for domestic, agricultural, industrial, or other legitimate use within the permit area and adjacent area that could be contaminated, diminished, or interrupted by subsidence. If the applicant cannot make this survey because the owner will not allow access to the site, the applicant shall include documentation of the denial of access. The applicant shall pay for its technical assessment or engineering evaluation used to determine the quantity and quality of a water supply for domestic, agricultural, industrial, or other legitimate use. The applicant shall provide copies of the survey and any technical assessment or engineering evaluation to the property owner and the cabinet. If the owner or his/her representative is present at the time a survey, technical assessment, or engineering evaluation is conducted, the surveyor shall include the name of the person. If the owner disagrees with the results, he/she may submit in writing to the cabinet and permittee, a detailed description of the specific areas of disagreement. The cabinet may require additional measure to ensure that adequate and accurate information is included and to ensure compliance with 405 KAR 18:210.

At subsection 32(3)(e), Kentucky is modifying its original submission language to state, “The determination shall include a finding on whether the proposed underground mining activities conducted after July 16, 1994, may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the permit area or adjacent areas that is used for domestic, agricultural, industrial, or other legitimate use.”

Kentucky is adding new subsection 26 (Incorporation by Reference) to incorporate: "Corps of Engineers Wetlands Manual and Regulatory Guidance Letter #90-7, “National Lists of Plant Species that Occur in Wetlands and Biological Reports and Summary,” and “List of Hydric Soils of the U.S.”

At subsection 26(1)(d) 1 and 2, Kentucky is requiring that a permit application include a survey of the quantity and quality of each water supply for domestic, agricultural, industrial, or other legitimate use within the permit area and adjacent area that could be contaminated, diminished, or interrupted by subsidence. If the applicant cannot make this survey because the owner will not allow access to the site, the applicant shall include documentation of the denial of access. The applicant shall pay for its technical assessment or engineering evaluation used to determine the quantity and quality of a water supply for domestic, agricultural, industrial, or other legitimate use. The applicant shall provide copies of the survey and any technical assessment or engineering evaluation to the property owner and the cabinet. If the owner or his/her representative is present at the time a survey, technical assessment, or engineering evaluation is conducted, the surveyor shall include the name of the person. If the owner disagrees with the results, he/she may submit in writing to the cabinet and permittee, a detailed description of the specific areas of disagreement. The cabinet may require additional measure to ensure that adequate and accurate information is included and to ensure compliance with 405 KAR 18:210.

At subsection 32(3)(e), Kentucky is modifying its original submission language to state, “The determination shall include a finding on whether the proposed underground mining activities conducted after July 16, 1994, may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the permit area or adjacent areas that is used for domestic, agricultural, industrial, or other legitimate use.”
for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 17:00—Subsidence Control, Kentucky cites KRS 350.028(2), (5), 350.151(1), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 18:090—Sedimentation Ponds, Kentucky cites KRS 350.028(1), (5), 350.151(1), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 18:100—Permanent and Temporary Impoundments, Kentucky cites KRS 350.028(2), (5), 350.51(1), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 18:160—Coal Mine Waste Dams and Impoundments, Kentucky cites KRS 350.028(2), (5), 350.151(1), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 18:210—Subsidence Control, Kentucky cites KRS 350.028(2), (5), 350.151(1), and 350.465(2) as the authorization to promulgate administrative regulations for surface and underground coal mining operations. Only minor, nonsubstantive wording changes were made.

At section 405 KAR 19:001—Definitions (405 KAR Chapter 19), Kentucky defines the following terms: Durable Rock and In Situ Process are defined in the same manner as in section 8:001 above.

Durable Rock: Durable rock is defined as that which cannot be damaged by subsidence within the area encompassed by the applicable angle of draw. If a dispute arises over the adequacy of the survey, underground operations shall not be conducted closer to a structure than the horizontal distance established under this paragraph until the cabinet has made a determination on the dispute. The cabinet shall make a determination within 30 days after receiving the written disagreement.

At subsection 1(4)(e), Kentucky clarifies that this subsection applies: (1) to extraction of coal under a permit amendment, and permit revision issued after the effective date of this regulation, and (2) 180 days after the effective date of this regulation, to extraction of coal under a permit, permit amendment, and permit revision issued prior to the effective date of this regulation.

At subsection 1(4)(f), Kentucky requires the permittee to conduct and submit to the cabinet a survey of the condition of each noncommercial building or occupied residential dwelling and related structures that may be damaged by subsidence within the area encompassed by the applicable angle of draw. If a dispute arises over the adequacy of the survey, underground operations shall not be conducted closer to a structure than the horizontal distance established under this paragraph until the cabinet has made a determination on the dispute. The cabinet shall make a determination within 30 days after receiving the written disagreement.

At subsection 1(4)(g), Kentucky clarifies that this subsection applies: (1) to extraction of coal under a permit amendment, and permit revision issued after the effective date of this regulation, and (2) 180 days after the effective date of this regulation, to extraction of coal under a permit, permit amendment, and permit revision issued prior to the effective date of this regulation.

At subsection 2(1), Kentucky is changing the 3-month notification requirement to 90 days.

At subsection 2(2), Kentucky is requiring that if notice has been given and subsequent emergencies or other unforeseen conditions in underground mining necessitate mining beneath the property or structure sooner than 90 days after the notice, the permittee shall immediately provide additional written notice to the owner or occupant that the mining will be conducted sooner than 90 days if approved by the cabinet. The permittee shall submit a written request for approval, including a description of the unforeseen conditions that necessitate mining sooner than 90 days after the initial
notice. If the cabinet determines that conditions necessitate mining sooner than 90 days after the initial notice, and if the required presubsidence condition survey of structures, or documentation of denial of access to conduct the survey, has been submitted, and the cabinet has made a determination on a dispute, if any, that has arisen over the adequacy of the survey, the cabinet may approve the request. The cabinet shall promptly notify the permittee in writing of its determination. However, in no case shall mining be conducted beneath the property or structure sooner than 10 days after the additional notice is given, unless the 10-day notice period is expressly waived by the owner in writing.

At section 2(3)(b), Kentucky is requiring that the notification include dates that specific areas are anticipated to be undermined.

At section 3(2), Kentucky is adding “occupied residential” to modify “dwellings” as they pertain to repair or damage.

At subsection 3(4)(d), Kentucky provides that presumption may be rebutted if the evidence establishes that the damage: (1) predated the mining, (2) was proximately caused by another factor and not the subsidence, (3) occurred outside the surface area within which subsidence was actually caused by the mining in question.

At subsection 4(1), Kentucky provides that under specified conditions, the cabinet may limit the percentage of coal extracted under or adjacent to the feature, facility, aquifer, or body of water.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. Specifically, OSM is seeking comments on the revisions described above to the original submission. If the amendment is deemed adequate, it will become part of the Kentucky program.

Written Comments

Written comments should be specific, pertinent to the issues proposed in this rulemaking, and include explanations in support of the commenter’s recommendations. Comments received after the time indicated under “DATES” or at locations other than the Lexington Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

IV. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific state, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 et seq.).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic impact upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

List of Subjects in 30 CFR Part 917

Intergovernmental relations, Surface mining, Underground mining.

Michael K. Robinson,
Acting Regional Director, Appalachian Regional Coordinating Center.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1202

RIN 3095–AA66

Privacy Act Regulations

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would streamline NARA regulations implementing the Privacy Act of 1974 by revising and simplifying policies for release of medical information, clarifying whom in NARA individuals contact with Privacy Act requests and appeals, and removing detailed internal NARA operating procedures that do not belong in the regulation. NARA is taking this action after conducting a review of its existing Privacy Act regulations in accordance with Executive Order 12866.

DATES: Comments must be received by October 26, 1998.

ADDRESSES: Comments must be sent to Regulation Comment Desk, Policy and Communications Staff (NPOL), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001.

FOR FURTHER INFORMATION CONTACT: Nancy Allard at (301) 713–7360, extension 226, or Mary Ronan at (301) 713–6025, extension 226.

SUPPLEMENTARY INFORMATION: This rule is a significant regulatory action for the purposes of Executive Order 12866, and has been reviewed by OMB. As required by the Regulatory Flexibility Act, it is
