

rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 24.51 percent for stainless steel wire rods, the all others rate established in the LTFV investigations. See *Amended Final Determination and Antidumping Duty Order: Certain Stainless Steel Wire Rods from France* (59 FR 4022, January 28, 1994).

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with section 353.34(d) of the Department's regulations. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: August 20, 1998.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 082098J]

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council will convene public meetings of the Reef Fish Advisory Panel (AP) and the Standing and Special Reef Fish Scientific and Statistical Committee (SSC).

DATES: The meeting of the Reef Fish AP will begin at 8:30 a.m. on Tuesday, September 8, 1998, and conclude by 4:00 p.m. The Standing and Special Reef Fish SSC will begin at 8:30 a.m. on Wednesday, September 9, 1998, and conclude by 12:00 noon. A meeting of the Standing SSC will begin at 1:30 p.m. on Wednesday, September 9, 1998, and conclude by 12:00 noon on Thursday, September 10, 1998.

ADDRESSES: The meeting will be held at the Crowne Plaza New Orleans, 333 Poydras Street, New Orleans, LA 70130; telephone: 504-525-9444.

Council address: Gulf of Mexico Fishery Management Council, 3018 U.S. Highway 301 North, Suite 1000, Tampa, Florida, 33619.

FOR FURTHER INFORMATION CONTACT: Steven Atran, Population Dynamics Statistician, Gulf of Mexico Fishery Management Council; telephone: 813-228-2815.

SUPPLEMENTARY INFORMATION: The AP, consisting of recreational and commercial fishermen, will review stock assessments of gag and vermilion snapper that were prepared by the NMFS and reports from the Council's Reef Fish Stock Assessment Panel and Socioeconomic Panel that include biological, social, and economic information related to the range of acceptable biological catch (ABC). Based on these reports, the AP may recommend levels of total allowable catch (TAC) for these species and appropriate management measures.

The Standing and Special Reef Fish SSC, consisting of economists, biologists, sociologists, and natural resource attorneys, will also review the above reports, comment on their scientific adequacy, and may make recommendations regarding TAC and management measures. In addition, the Standing SSC will review a report of an Ad Hoc Finfish Stock Assessment Panel on additional alternatives for potential proxies for maximum sustainable yield (MSY) for at least red snapper, king mackerel, and red drum. The Standing SSC will also consider the feasibility of using the ratio of natural mortality rate to growth rate (the M/K ratio) as a basis for setting the appropriate level of spawning potential ratio (SPR) that should be used as a proxy for MSY. Generation times for jewfish and Nassau grouper may also be considered. In addition, the Standing SSC will review

a presentation from NMFS on the effectiveness of shrimp trawl bycatch reduction devices (BRDs) with respect to reducing juvenile red snapper bycatch mortality. The results of the NMFS BRD study will be a major factor in the decision by NMFS on whether to release additional red snapper TAC in 1998.

Although other issues not on the agenda may come before the panels for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Actions will be restricted to those issues specifically identified in the agenda listed as available by this notice.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Anne Alford at the Council (see **ADDRESSES**) by September 1, 1998.

Dated: August 21, 1998.

Gary C. Matlock,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
