

change in the temperature and pH limitations for sulphopropyl cellulose ion-exchange resin for the recovery and purification of proteins for food use.

Subsequent to the publication of the filing notice, it was determined that the proposed amendment of the provisions in § 173.25(b)(5) also necessitated an amendment of the provisions in § 173.25(d)(2), the paragraph that provides extraction requirements for the ion-exchange resin. Accordingly, the petitioner amended the petition to request an amendment of § 173.25(d)(2).

Therefore, FDA is amending the filing notice of July 22, 1996, to indicate that the petitioner requests that the food additive regulations be amended to modify the extraction requirements for sulphopropyl cellulose resin in § 173.25(d)(2).

The agency has determined under 21 CFR 25.32(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.
