

previous years have spawned successfully and that the Corps' transportation program appears to have maintained and potentially increased levels of coho salmon natural production in the Elk Creek Basin. ESA-listed adult fish are proposed to be captured at a weir below the dam, anesthetized, transported above the dam, allowed to recover from the anesthetic, and released. In addition to transporting the ESA-listed adult fish, the Corps proposes to tag the fish with opercule punches to estimate the number of fish that pass downstream over the weir and are then captured a second time. ESA-listed adult fish indirect mortalities associated with the transportation program are requested. The Corps also requests that ODFW be authorized to act as an agent of the Corps under the permit.

Those individuals requesting a hearing on the permit application should set out the specific reasons why a hearing would be appropriate (see ADDRESSES). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: August 24, 1998.

Kevin Collins,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.
