SUPPLEMENTARY INFORMATION: Region 6 of the EPA publicly announced on June 26, 1998, in the **Federal Register** (see 63 FR 34874) the proposed reissuance of the EPA Region 6, National Pollutant Discharge Elimination System (NPDES) general permits for concentrated animal feeding operations (CAFOs) in New Mexico (Permit Nos. NMG800000 and NMG810000); Oklahoma (Permit Nos. OKG800000 and OKG810000); and Texas (Permit Nos. TXG800000 and TXG810000) and all Indian Country Lands within these States. EPA requested the general public to submit written comments on the proposed permits to EPA Region 6 during the public comment period ending on August 25, 1998. However, EPA has received numerous requests both during public hearings on the proposed permits and by mail to extend the August 25, 1998, deadline for commenting on the proposed permits. After considering these comments, EPA has decided to extend the comment period from August 25, 1998, to October 12, 1998. Therefore, the comment period for these general permits has been reopened and EPA Region 6 will be accepting additional comments on the proposed CAFO general permits until October 12, 1998.

The public may comment on any aspects of the proposed permits. However, EPA is particularly requesting comments on the following issues:

1. Should the general permit coverage be limited to some maximum number of animal units? If so, what should this maximum number be?
2. Should the 303(d) list be used to establish stream segments impaired due to nutrients? If not, what specific criteria should be utilized?

3. Should all nutrient-impaired watersheds be included in the impaired watershed permit or only those specifically identified as related to CAFO activities?

4. The applicability of the proposed permits to pollutants from poultry operations that spread litter (manure) to land in a non-agronomic manner.

5. The definition of agricultural (agronomic) uses of manure based upon nitrogen and phosphorus application rates.

6. The appropriate rates of manure application in impaired and nonimpaired watersheds when the manure is applied at rates that exceed agronomic rates.

Director, Water Quality Protection Division, Region 6.
