

DEPARTMENT OF DEFENSE**Department of the Army****Final Environmental Impact Statement (FEIS) for the Proposed Upgrade of Training Areas and Facilities, Camp Atterbury, Indiana, by the Indiana Army National Guard (INARNG)**

AGENCY: National Guard Bureau, Department of the Army, DoD.

ACTION: Notice of availability.

SUMMARY: The purpose of the project is to maximize training opportunities for military units that use Camp Atterbury. Military units need to be able to maintain a high level of training and state of readiness to support national defense and state mission in times of natural disaster, civil unrest, and other emergencies. Adequate training opportunities, with up-to-date equipment, must be available to allow them to train for their assigned mission.

DATES: The public review period for this FEIS ends 30 days after the date of publication of the Environmental Protection Agency's Notice of Availability in the **Federal Register**.

ADDRESSES: A copy of the FEIS can be obtained by writing to Major Rick Jones, EIS Project Officer, Indiana Army National Guard, 2002 S. Holt Road, Indianapolis, Indiana 46241-4839.

FOR FURTHER INFORMATION CONTACT: Major Rick Jones at (317) 247-3105, facsimile extension 3414.

SUPPLEMENTARY INFORMATION: The INARNG proposes to upgrade training areas and facilities at Camp Atterbury, Indiana. The proposed action includes the construction of a Multi-Purpose Training Range (MPTR). The proposed action does not include development of maneuver corridors. These corridors, if proposed for addition in the future, will be the subject of a supplemental National Environmental Policy Act document. The MPTR will be located in the southwest sector of the installation and will be used for training by armor, attack helicopter, Infantry Fighting Vehicles, and dismounted infantry units. The MPTR would include a support area, firing area and a target area. The firing area would include stationary, moving and defilade firing positions. The target area would contain stationary and moving targets. Firing points would be oriented to provide northeasterly trajectories into the existing impact area. The MPTR itself would occupy approximately 80 hectares (200 acres) and, including the safety fan, the area involved would total about, 4,550 hectares (11,250 acres).

Three alternatives in addition to the proposed action were considered—the first (Alternative 2A) includes the construction of the MPTR and two maneuver corridors, another alternative with less development (Alternative 2B), and the no action alternative. Alternative 2B involves the MPTR being located in the northwest sector of Camp Atterbury, with firing points oriented to provide south-easterly trajectories into the impact area, and would involve the development of only the eastern maneuver corridor. The no action alternative considers the continued use of Camp Atterbury without the proposed upgrade.

A 45-day public review and comment period was provided for the Draft Environmental Impact Statement (DEIS). Two public meetings were conducted near Camp Atterbury, Indiana, on the DEIS after the Notice of Availability was published. After all the comments were compiled and reviewed, responses were prepared to all relevant environmental issues that were raised. These responses to comments and/or any new pertinent information were incorporated into the DEIS to constitute the FEIS.

After the 30-day review period on the FEIS has ended, a Record of Decision will be published.

Copies of the FEIS will be mailed to individuals who participated in the public scoping process. Copies will also be sent to Federal, state, regional, and local agencies; interested organizations and agencies; and public libraries. Individuals not currently on the mailing list may obtain a copy by request.
