

Williston Basin states that it is seeking the requested waiver so that it can rescind a \$61,905.32 fuel reimbursement bill sent to Montana-Dakota Utilities Co., which resulted from Montana-Dakota's failure to cycle contractually required quantities of its storage gas. The under-cycling was due to the extremely warm weather experience during the 1997-98 winter heating season.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 16, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP98-395-000]

Young Gas Storage Company, Ltd.; Notice of Tariff Filing

September 9, 1998.

Take notice that on September 2, 1998, Young Gas Storage Company, Ltd. (Young), tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the tariff sheets listed in attached Appendix A to the filing, to be effective October 5, 1998.

Young states the Commission authorized it to develop, construct and operate an underground storage facility to provide open access storage service in an order that was issued June 22, 1994 in Docket No. CP93-541-000 and 001. As the field approaches full development, Young states it is proposing changes to its Original Volume No. 1 Tariff to more accurately match the field's actual capabilities. Young states it is proposing to add a Reservoir Integrity Inventory Limit that defines the upper safe limit, such that the field may be operated to its design

maximum inventory while maintaining control over the expansion of the gas bubble.

Young also states it is proposing to adjust the original design parameters for the Maximum Daily Withdrawal Quantity and the Available Daily Withdrawal Quantity, such that they will more accurately match the field capabilities.

Young states it is also proposing to (i) revise the definition of Maximum Daily Withdrawal Quantity to allow Young to shut-in the field at or about the end of the injection cycle in order to perform reservoir management, measurement, and assessment functions; (ii) remove rates that were effective during years 1 through 3 of development; (iii) allowing customers more flexibility to maintain a higher level of gas in storage at the end of the withdrawal season; (iv) and change the assumed Btu per cubic foot in the definition of Average Thermal content of gas in storage.

Young states that copies of the filing have been mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,
Secretary.
