[Airspace Docket No. 95-AWP-6]

Realignment of VOR Federal Airway V-485; San Jose, CA

RIN 2120-AA66

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters Federal Airway 485 (V-485) from the Priest, CA, Very High Frequency Omnidirectional Range (VOR) to the San Jose Very High Frequency Omnidirectional Range/Distance Measuring Equipment (VOR/DME). The FAA is taking this action to improve traffic flow, reduce pilot and controller workload, and support an instrument approach procedure.

EFFECTIVE DATE: 0901 UTC, December 3, 1998.

FOR FURTHER INFORMATION CONTACT: William C. Nelson, Airspace and Rules Division, ATA-400, Office of Air Traffic Airspace Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

History

On July 18, 1995, the FAA proposed to amend 14 CFR part 71 to alter V-485

from the Priest, CA, VOR to the San Jose, CA, VOR/DME (60 FR 36751).

On June 2, 1997, the FAA published a supplemental notice of proposed rulemaking (SNPRM) in the **Federal Register** which modified the proposed new routing to add an intersection along V-485 between the Priest VOR and the San Jose VOR/DME (62 FR 29679).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the original proposal or the amended proposal were received. Except for editorial changes, this amendment is the same as that proposed in the SNPRM.

Domestic VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The airway listed in this document will be published subsequently in the Order.

The Rule

This action amends 14 CFR part 71 by modifying V-485. This action relocates V-485 approximately 1 nautical mile to the northeast from its previous routing, and amends the Federal airway to end at the San Jose VOR/DME. This action enhances safety and reduces pilot and controller workload, while accommodating the concerns of airspace users.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
