This program is conducted in furtherance of the Secretary's obligations under the Fish and Wildlife Act of 1956 (16 U.S.C. 742a-742j, as amended) and the Fish and Wildlife Coordination Act (16 U.S.C. 661-667e, as amended).

B. Background

The Biological Resources Division (BRD) of the U.S. Geological Survey gathers and analyzes biological information and serves as an information clearinghouse, providing broad access to the widest possible range of factual data on the status and trends of the Nation's biota and the potential effects of land management choices. This information serves public and private landowners who are interested in sustaining biological resources. It also provides understanding to help avoid conflicts that can both impede development and degrade natural habitats.

The Species at Risk Program will develop scientific information and alternatives to assist Federal State, and other land managers in their decisions regarding the protection of sensitive species and habitats.

C. Availability of Funds

Through this program, pre-proposals are invited for funding in Fiscal Year 1999 from non-Federal research, scientific or technical organizations. Total funding anticipated for the fiscal year is approximately \$375,000. Monies will be provided to successful applicants on a competitive basis. There is no minimum project cost; the maximum project cost; the maximum project cost will be \$80,000.

Funds for this program are not currently available. Funding of the program is contingent on a Fiscal Year 1999 appropriation.

D. Eligibility Requirements

Under the terms specified in the information package, pre-proposals will be accepted from State agencies, private and industry groups, academic institutions, and Native American Tribes and Nations. Pre-proposals will be evaluated in light of their relevance to an identified management need, partnership opportunities, potential for providing useful information to resources managers, potential for conservation agreements, possibilities for cost sharing, and demonstration of successful completion within 18 months of date of initiation. Possible selectees will then be invited to submit a full

project proposal for scientific peer review and consideration of funding.

E. Application Process

Parties interested in participating in this program should request an information package that will include detailed application forms, Federal Assistance forms (Standard Form 424, etc.), proposal format requirements, etc., from: *Mail:* Species at Risk Program, 12201 Sunrise Valley Drive, MS 300, Reston, VA 20192, ATTN: Dr. Al Sherk, or *E-Mail:* Al_Sherk@usgs.gov or *Call:* (703) 648-4076.

F. Dates

Notice of interest in this program must be received by October 30, 1998.

Susan D. Haseltine,

Deputy Chief Biologist for Science, Biological Resources Division.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart I, Platforms and Structures.

OMB Control Number: 1010-0058.

Abstract: The Outer Continental Shelf (OCS) Lands Act, 43 U.S.C. 1331 *et seq.*, gives the Secretary of the Interior (Secretary) the responsibility to preserve, protect, and develop oil and gas resources in the OCS in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of human, marine, and coastal environments; ensure the public a fair and equitable return on offshore resources in the OCS; and preserve and maintain free enterprise competition. Specifically, the OCS Lands Act (43 U.S.C. 1356) requires the issuance of "* * * regulations which require that any vessel, rig, platform, or other vehicles or structure—* * * (2) which is used for activities pursuant to this subchapter, comply, * * * with such minimum standards of design, construction, alteration, and repair as the Secretary * * * establishes; * * *" The OCS Lands Act (43 U.S.C. 1332(6)) also states, "operations in the [O]uter Continental Shelf should be conducted in a safe manner * * * to prevent or minimize the likelihood of * * * physical obstruction to other users of the water or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health." To carry out these responsibilities, MMS has issued regulations at 30 CFR part 250. This collection of information pertains to subpart I, Platforms and Structures, and related Notices to Lessees and Operators (NTLs).

Respondents submit information on, and maintain records of, the design, fabrication, installation, use, and inspection of all platforms and structures on the OCS. The MMS regional offices use this information to ensure the structural integrity for the safe conduct of drilling, workover, and production operations, considering the specific environmental conditions at the platform location, and to ensure that such integrity will be maintained throughout the useful life of the

structures. We also use the information to ensure that any object (wellheads, platforms, etc.) installed in the OCS is properly removed and the site cleared so as not to conflict with or harm other users of the OCS.

Proprietary information will be protected under 30 CFR 250.118, Data

and information to be made available to the public. No items of a sensitive nature are collected. The requirement to respond is mandatory.
