SUPPLEMENTARY INFORMATION: The Vermilion Management Framework Plan (MFP) was completed in 1981. Since that time, changes in land use, public expectations, and the increasing potential for impairment of wilderness values and impacts to special status plant and animal species, etc., has resulted in the need to re-examine certain decisions documented in the MFP which may no longer apply to the Coral Pink Sand Dunes. In order to respond to these changes, the Kanab Field Office proposes to prepare a land use plan amendment and associated management plan for the Coral Pink Sand Dunes. The purpose of this effort is to develop a management strategy for

the Dunes and surrounding area of influence. Issues tentatively identified to be analyzed include OHV use and designations, methods to reduce impairment to wilderness values, recreation management, and special status species management. An interdisciplinary team will be utilized for the development of the proposed management plan, land use amendment and associated environmental assessment.

State Director.
