

are found in tropical Africa and southern and southeast Asia, that exhibit effective antimalarial properties and offer important new weapons in the treatment of this devastating disease. The deadliest malarial parasites have become resistant to previously effective antimalarial drugs; therefore, effective new antimalarial drugs are urgently needed. These new naphthylisoquinoline compounds effectively inhibit the growth, reproduction, and pathologic effects of a broad spectrum of *Plasmodia* parasites, including drug-resistant strains.

Dated: October 13, 1998.

Jack Spiegel,

Director, Division of Technology Development and Transfer, Office of Technology Transfer.
