

hours for these two provisions have been removed from the chart.

For the § 801.421(b) estimate in Table 1 of this document, FDA assumes that 9,900 hearing aid dispensers will have 162 sales annually (1.6 million sales, the current number of annual hearing aid sales, divided by 9,900 dispensers). For all such sales, the dispenser must provide the prospective user a copy of the user instructional brochure and the opportunity to read and review the contents with him/her orally, or in the predominant method used during the sale. FDA estimates that this exchange will involve .30 staff hours.

The § 801.421(c) estimate in Table 1 of this document assumes that 9,900 dispensers (which includes 40 hearing aid manufacturers/distributors) will provide copies of the user instructional brochure to any health care professional, user, or prospective user who requests a copy in writing. It is estimated that five written requests for copies of the brochures will be received by each hearing aid manufacturer/distributor and dispenser annually. It is estimated that each request for a brochure will take .17 staff hours to complete. This effort consists of the hearing aid manufacturer/distributor or hearing aid dispenser locating the appropriate user instructional brochure for the specific model and mailing the brochure to the requester.

The § 801.421(d) recordkeeping estimate in Table 2 of this document assumes that 9,900 hearing aid dispensers will each retain 162 records. Each record documents the dispensing of a hearing aid to a hearing aid user. Each recordkeeping entry is estimated to require 0.25 staff hours.
