SUPPLEMENTARY INFORMATION:

History

On July 28, 1998, a proposal to amend part 71 of the Federal Regulations (14 CFR part 71) to establish Class E airspace area at Guthrie, IA, was published in the **Federal Register** (63 FR 40228). This proposal was to establish controlled airspace extending upward from 700 feet AGL. The intended effect of the proposal was to provide adequate Class E airspace to contain aircraft executing GPS RWY 36 and NDB RWY 18 SIAPs at Guthrie County Regional Airport, Guthrie, IA.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

The Rule

This amendment to part 71 of the Federal Regulations (14 CFR part 71) establishes the Class E airspace area at Guthrie, IA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated

impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
