

higher out-of-pocket costs and reduced convenience for Medicare-eligible beneficiaries as they seek health care using their Medicare benefit, the Department believes that successful conduct of the MacDill 65 project will demonstrate the Department's ability to operate a cost-effective primary care program for Medicare-eligible beneficiaries.

The Department is also aware that the requirement for all MacDill 65 enrollees to have Medicare Part B represents an increased cost for those who rely solely on no-cost, space-available care at the MTF. However, Medicare regulations require Medicare-risk HMO members to also be enrolled in Part B. As the Department is strongly supportive of Medicare Subvention legislation, it is one of the reasons the Department has implemented a policy of encouraging military retirees to enroll in Part B upon reaching age 65. Also, enrollees in MacDill 65 will require Part B coverage to submit claims to Medicare for civilian provider services.
